PHARMACEUTICAL BENEFITS

Explanatory Circular regarding the August 1972 issue of the Schedule of Benefits for Approved Chemists

This reprint of the Schedule will take effect from 1 August 1972.

Attention is drawn to the regrouping of aspirin.

Existing items and new items are now listed in the Schedule under the three approved name headings of Aspirin, Aspirin (Buffered) and Aspirin (Soluble).

A summary of other alterations is set out below.

ADDITIONS

NEW ITEMS

Section 2—General Benefits

Amiloride, 5mg tablet (*Midamor*)
Aspirin (Buffered), 325mg tablet (*Bufferin*)
Glucose and Ketone Indicator, 50 reagent strips (*Keto-Diastix*)

NEW FORMS AND STRENGTHS OF EXISTING ITEMS

Section 2—General Benefits

Aminophylline with Ephedrine Hydrochloride and Amylobarbitone, 130mg–25mg–25mg tablet (*Phyline*)
Aspirin (Soluble), 500mg tablet (*Provoprin 500*)
Glucose Indicator, 100 reagent strips (*Diastix*)
Phenethicillin, 250mg per 5ml suspension (*Optipen Forte*)

Section 2—Restricted Benefits

Cephalexin, 500mg tablet (*Keflex*)
Epicillin, 125mg capsule (*Dexacillin*)
Kanamycin, 30mg in 1ml injection (*Kanasig*)
Medroxyprogesterone, 150mg in 1ml injection (*Depo-Provera*)
Trimethoprim with Sulphamethoxazole, 40mg–200mg per 5ml suspension (*Bactrim, Septrin*)

TRANSFERS

Restricted to Unrestricted

Dienoestrol, 0.01% cream

Hospital Only to Section 2—Restricted Benefits

Epicillin, 250mg and 500mg capsules (*Dexacillin*); 125mg per 5ml and 250mg per 5ml powders for syrup (*Dexacillin*)

DELETIONS

Section 2

Acetarsol, 250mg tablet only (*Stovarsol*)
Aldosterone, 500mcg injection (*Aldocorten*)
Bephenium Hydroxynaphthoate, 5G sachet (*Alcopar*)
Castor Oil, 5oz and 100ml
Chlorcyclizine, 50mg capsule only (*Perazil*)
Chlorpromazine, 50mg in 5ml injection only (*Largactil*)
Cocaine, 2% oily eye drops
Dichlorophen, 500mg tablet (*Anthiphen*)
Ethionamide, 125mg sugar coated tablet (*Trescatyl*)

Ichthammol, 5% possey
Insulin, 80 Units per ml, 5ml injection only
Morphine Sulphate with Hyoscine Hydrobromide, 15mg–600mcg in 1ml injection
Oestradiol Dipropionate, 5mg in 1ml injection (*Ovocyclin*)
Phenylephrine, 1%, 1ml injection only (*Neo-Symphrine*)
Prednisolone Pivalate, 0.5% eye ointment (*Ultracortanol*)
Prednisolone Sodium Phosphate with Neomycin, 5mg–3.5mg (base) per ml, 5ml ear drops (*Predsol-N*)
Progesterone, 25mg I.M. injection (*Proluton, DF brand*)
Reserpine, 0.5mg tablet only (*Resedrex, Ryser, Serpasil*)
Senna Fruit, 50G
Tetracosactrin, 2mg in 2ml injection only (*Cortrosyn Depot, Synacthen Depot*)
Thiambutosine, 20% oily suspension injection only (*Ciba 1906 Depot*)
Trimethoprim with Sulphamethoxazole, 20mg–100mg tablet only (*Bactrim, Puromyn, Septrin*)
Triprolidine, 2.5mg capsule only (*Actidil*)

Intravenous Fluids

Sodium Chloride Compound and Dextrose, 10%, 1 litre only

PROPRIETARY INDEX

INTRODUCTION

These notes are designed for the use of approved chemists. They describe the procedure by doctors in prescribing benefits and the procedures by approved chemists in supplying benefits. They go on to outline the action on the part of approved chemists in coding prescriptions for processing by computer and the submission by them of claims for payment. Finally the notes explain the pricing arrangements in accordance with which approved chemists' claims are processed for payment.

CONDITIONS UNDER WHICH BENEFITS MAY BE PRESCRIBED AND DISPENSED

A. PRESCRIBING OF BENEFITS—

PROCEDURE BY DOCTORS

1. All pharmaceutical benefits are listed in this book.

2. Ready prepared items are listed in the Schedule of Benefits, Sections 2 and 3.

3. The drug tariff comprising all benefit items and additives which may be used in extemporaneous preparations is listed in Section 4—(Green pages). Any restriction which applies to the use of a drug listed in this section is indicated against the item.

4. The following admixtures are not pharmaceutical benefits:

(a) The admixture of two or more ready prepared items listed in the Schedule of Benefits.

(b) The admixture of a ready prepared item and a drug or drugs listed in the Drug Tariff—Section 4.

5. The Schedule of ready prepared items includes the form, manner of administration and brand in which these items may be prescribed. Where the words 'solvent required' are included after the form, the item and a solvent may be prescribed as one benefit. In such cases, any determined brand of solvent may be ordered with the item. For clarity, such benefits should be written as one prescription, e.g., 'Penicillin Benzyl, Injection 300 mg amp with 2ml water for injections'.

6. The Schedule also shows the maximum quantity and the number of repeats. Further details may be found in these notes—paragraphs 13-18.

7. Symbols use in the Schedule of Benefits.

See page 1, section 2 (white pages).

Prescriptions

8. A prescription ordering a pharmaceutical benefit may be written only for the medical treatment of the person named on the prescription and requiring treatment with that drug. A prescription must not be written for any other purpose and is valid only when it is written by a registered medical practitioner.

9. Medical Practitioners are required to observe the following rules when writing prescriptions as pharmaceutical benefits—

CARE MUST BE TAKEN THAT THE PROVISIONS OF STATE LAW ARE DULY COMPLIED WITH, PARTICULARLY WITH REGARD TO PRESCRIBING OF DRUGS LISTED AS NARCOTIC, SPECIFIED OR RESTRICTED UNDER STATE LEGISLATION.

(a) Write the prescription in indelible form (ink or ball point pen) in own handwriting (or with the approval of the Director-General otherwise record the prescription) either on the standard prescription form obtained from the printer nominated by the Department or on paper as near as convenient to 7" X 5". The name and address of the medical practitioner should be shown.

(b) Write the prescription in duplicate, marking the duplicate with the word 'Duplicate' (this is pre-printed on the standard prescription forms and on Authority to Prescribe Form PB 15).

(c) Set out the name and address of the patient, and where the patient holds an S.H.B. (Subsidised Health Benefits) entitlement card write the number in the space provided or at the end of the second line provided for the patient's address. Where the patient is a pensioner who holds an entitlement card, write the pension number. EXCEPT WHERE THE PROVISIONS OF STATE LAW REGARDING NARCOTIC, SPECIFIED OR RESTRICTED DRUGS REQUIRE THE ADDRESS TO BE WRITTEN, it is not necessary to write the pensioner's or S.H.B. patient's address on the prescription form.

(d) In the case of pharmaceutical benefits which are restricted in use, the prescription should be endorsed with the words 'Specified Purpose'. Abbreviations such as 'Spec. Purp.' or 'S.P.' will be accepted. However where a prescription is written for a pensioner for a drug which is restricted to pensioners for any disease or purpose, it is not necessary to endorse the prescription 'Specified Purpose'.

(e) If the benefit is a single drug, indicate the manner of administration.

(f) Where a medical practitioner writes a prescription as a pharmaceutical benefit but does not specify a particular formula or brand for the item prescribed, the approved chemist when dispensing shall give priority to either the formula (if any) for that item specified in the Prescribers' List or to one of the ready prepared brands (if any) for that item included in the Schedule of Benefits.

(g) When directing the supply, on the one occasion, of the maximum quantity and repeats of a pharmaceutical benefit, endorse the prescription in own handwriting with the words 'Regulation 24' (see also paragraph 18).

(h) Mark the form 'N.H.S.', date and sign it.

It is requested that doctors write no more than three prescriptions on any single form.

Prescribers' List formulations are now expressed in metric terms and made up to metric doses or quantities. Prescriptions consisting of or containing a Prescribers' List formula should therefore be written in the metric system.

Prescriptions for pharmaceutical benefits for more than one person shall not be written on the one sheet of paper.

10. A prescription is not valid if it—

(a) Prescribes a pharmaceutical benefit for a person in respect of whom another prescription for the same benefit has been written on the same day by the same medical practitioner.

(b) Prescribes on the one form a benefit that is a drug of addiction and another benefit and directs that the supply of either benefit is to be repeated. (If no repeats of either item are ordered, the prescription may be accepted).

(c) Prescribes a narcotic drug for the medical practitioner writing the prescription.

To avoid confusing patients and the dispensing chemist, doctors should avoid writing prescriptions for pharmaceutical benefits and non-pharmaceutical benefits on the one form. Where the prescription is for a 'Specified Purpose' drug and the patient is not suffering from one of the allowable conditions, the doctor should write the prescription on a private prescription form, or if he does use an N.H.S. standard prescription form, delete the N.H.S. printed endorsement.

Manner of Administration

11. Where a particular manner of administration is indicated in the Schedule, no other manner of administration may be directed in a prescription for that benefit.

Restrictions

12. Certain pharmaceutical benefits may only be prescribed for a particular class of person, for a specified purpose, disease or condition, or with the written authority of the Commonwealth Director of Health. Full particulars of these drugs and the restrictions are printed in red in the Schedule. It is not necessary for the particular restriction to be identified on the prescription. Items restricted for use in 'Approved Hospitals Only' are listed in Section 3 (Pink Pages) of the Schedule. These items are not available in all approved hospitals and medical practitioners should ensure that the items are available at the particular hospital before prescribing. Items restricted to use for Colostomy and Ileostomy conditions are also listed in Section 3 of the Schedule.

Maximum Quantities and Repeats

13. The maximum quantity and number of repeats allowable are shown in columns 3 and 4 of the Schedule of Benefits. For other preparations, details are set out in the Table of Maximum Quantities and Repeats—green pages.

The maximum quantity of items marked with a double dagger (≠) has been determined as a single pack and as explained in paragraph 7 unbroken packs are supplied. It would assist therefore if these items are prescribed in original pack sizes.

For other items, it is not necessary to prescribe the maximum quantity either for the original or a repeat supply, if the medical practitioner considers a lesser quantity is sufficient for the patient's needs.

If a medical practitioner requires a prescription to be repeated he should show the quantity to be supplied and the number of repeats. It is not necessary for the maximum quantity to be ordered before the supply can be repeated. Repeats may be for any quantity up to the maximum, irrespective of whether the original supply is for an equal, greater or lesser quantity.

14. The relevant maximum quantity and number of repeats are not to be exceeded, unless the prescription is accompanied by a written authority (see paragraphs 15-16). A benefit shall not be supplied a number of times greater than the number specified in the prescription.

15. Where a person is suffering from a chronic complaint a medical practitioner may, with the written authority of the Commonwealth Director of Health, direct the supply of a quantity of a pharmaceutical benefit greater than the maximum quantity which would otherwise be allowed.

16. In circumstances where it is desirable that the patient be not obliged to re-visit his doctor in order to secure repeat supplies, the doctor may, with the written authority of the Commonwealth Director of Health, direct that the supply of a pharmaceutical benefit be repeated more times than the number of repeats specified in the Schedule.

17.—(a) The written authority of the Commonwealth Director of Health to prescribe:

- (i) restricted drugs (paragraph 12); or
- (ii) increased maximum quantities (paragraph 15); or
- (iii) increased number of repeats (paragraph 16),

will be forwarded to the doctor on an Authority to Prescribe (Form PB15).

(b) On receipt, the doctor writes the prescription on the original (white) form PB15 in the space provided for this purpose. The doctor will retain the yellow copy as his record, and hand the original (white) copy and duplicate copy to the patient.

18. Generally, a pharmaceutical benefit may not be supplied to the same person more than once on any one day. However, a doctor may direct that the original supply and repeat supplies of a benefit ordered in a prescription be supplied at the one time, provided he is satisfied that—

- (a) the maximum quantity specified for the benefit prescribed is insufficient for the medical treatment of the person for whom the prescription is written;

- (b) that person is suffering from a chronic illness or is a resident in a place remote from the nearest approved chemist or approved medical practitioner; and
- (c) that person, without great hardship, could not obtain the pharmaceutical benefit on separate occasions.

The doctor must endorse the prescription 'Regulation 24', as certification that the above conditions have been satisfied.

Urgent Cases

19. A pharmaceutical benefit may be supplied by an approved chemist before the prescription for that benefit has been surrendered to him, where in cases of urgency, the doctor communicates the prescription to the approved chemist by telephone or other means. *In such cases the doctor must reduce the prescription to writing and forward it to the approved chemist who made the supply within 24 hours of such communication.* This provision does not apply to prescriptions for supply by approved chemists where the law of the State in which that approved chemist's premises are situated requires the prescription to be in writing.

20. The provision for communication of prescriptions in urgent cases applies also to those drugs for which the written authority of the Commonwealth Director of Health is necessary for supply as a pharmaceutical benefit (see paragraph 12). In such cases, the doctor must first obtain advice from the Commonwealth Director of Health in the particular State, by telephone or other means, that the authority will be issued and notify the approved chemist accordingly when communicating the prescription. *The doctor must subsequently obtain the written authority and forward it, within 24 hours of its receipt to the approved chemist who supplied the benefit.*

Emergency Drug (Doctor's Bag) Supplies

21. Doctors are entitled to obtain certain pharmaceutical benefits for emergency use. These emergency supplies are not available to ships' doctors. The patient is not required to make any payment when benefits are made available to him from these supplies.

22. Supplies of these drugs may be obtained from an approved chemist upon the production of an official Emergency Drug (Doctor's Bag) order form (except Form PB7A) in duplicate, signed by the doctor personally. Each order form is valid only during the month printed thereon and each doctor may obtain the benefits not more often than once per month. If the signature appearing on an Emergency Drug (Doctor's Bag) order form is that of a doctor unknown to the approved chemist the latter is required to obtain, from the person presenting the order, particulars of the full name and address and medical registration number of the doctor, and endorse these particulars on the back of the original copy of the order form. Doctors approved to supply pharmaceutical benefits under

Section 92 of the National Health Act must not present Doctor's Bag order form PB7A to an approved chemist for their supplies. Special instructions are issued to these doctors.

23. The maximum number of units of each listed form of emergency drug may be obtained at the one time, but only if the quantity of the drug that the doctor has on hand is less than that maximum quantity.

24. A doctor may also specify on the order form a particular brand of a benefit. If it is not available, the doctor should be requested to specify in the order a permitted brand which is available, and to initial the alteration. A receipt for the supply of benefits under this provision must be given on the order form. The receipt may be signed by the doctor himself or by a person authorised by him.

B. SUPPLY OF BENEFITS—PROCEDURE BY APPROVED CHEMISTS

Prescriptions

25. An approved chemist is authorised to supply a pharmaceutical benefit only upon the surrender of—

- (a) a valid prescription, dated within six months before the date of its presentation; or
- (b) a benefit ordered on an Authority to Prescribe (Form PB15); or
- (c) a repeat authorisation presented with a duplicate prescription within six months of the date of the prescription.

Prescriptions for items deleted from the Schedule of Benefits may not be dispensed as benefits as from the date of effect of deletion. However, where a restriction is applied to the prescribing of a benefit, valid prescriptions written before the date of effect of the restriction may still be dispensed as benefits.

26.—A. Before a benefit is supplied on presentation of a prescription the approved chemist is required to:—

- (i) mark his name and approval number on the prescription form and duplicate;
- (ii) allot a number which will identify the prescription and write that number on the form and duplicate; and
- (iii) if more than one prescription has been written on the one form allot a separate number to each prescription.

The National Health Act requires that a prescription must be written by a registered medical practitioner. In the event that the chemist cannot recognise the doctor's signature he should take all reasonable steps to satisfy himself that the prescription was written by a registered medical practitioner.

B. When a benefit is supplied on presentation of a repeat authorisation, the approved chemist shall mark his name and approval number in the space provided on the repeat authorisation.

C. Before a benefit is supplied on presentation of a prescription which contains a direction to repeat the supply (when repeats are allowable) or on a repeat authorisation requiring further allowable repeats the approved chemist shall prepare a repeat authorisation form in duplicate, except when supply under the provisions of Regulation 24 is authorised (see paragraph 30). The repeat authorisation form shall show:—

- (i) the number of times the benefit has been directed to be supplied and the number of times supply has been made;
- (ii) on the first occasion of supply of the benefit, his approval number together with the identifying number allotted by him to the prescription and the date of the original prescription;
- (iii) on subsequent occasions of supply (except the final occasion of supply) the approval number and the prescription identifying number relating to the original supply and the date of the original prescription;
- (iv) if the prescription or repeat authorisation is for a pensioner or S.H.B. person, the pension number or S.H.B. entitlement number appearing on the prescription;
- (v) in the case of repeats on an Authority to Prescribe (Form PB15), the authority number should be endorsed on the repeat authorisation (Form PB13) in the space provided.

D. At the time of supply of the benefit the completed repeat authorisation together with duplicate of the prescription is to be issued to the person to whom the benefit is supplied.

E. Separate repeat authorisations are to be prepared in respect of each benefit and for solvents when an injectible solvent is prescribed. The procedure to be followed in endorsing prescriptions and repeat forms is covered in 'CODING AND SUBMISSION OF PRESCRIPTIONS—PROCEDURE BY APPROVED CHEMISTS'.

27. Prescription forms which prescribe both pharmaceutical benefit items and non-pharmaceutical benefit items may be accepted. The non-benefit items will be supplied as private prescriptions and cancelled from the form.

Procedure when an Authority is presented

28.—A. When a benefit is ordered on an Authority to Prescribe (form PB15) the doctor will have written the prescription on the original (white) and duplicate copies of the Authority form. The approved chemist will—

- (a) enter in the designated places on the Authority form—
 - (i) the serial number of the prescription;
 - (ii) code for brand of benefit ordered where the Department has, in the absence of prior knowledge of the prescriber's intention,

omitted to endorse a brand in the appropriate coding space and one is specified in the prescription;

- (iii) prescription number (reference to the relevant entry in the prescription book);

- (b) where a solvent has been prescribed for an injectible and there are no repeats ordered a code stamp imprint will be placed on the front of the white form (PB15) and a separate serial number and code for the solvent entered thereon; and
- (c) obtain the signature of the patient or signature and address of the agent and date of supply.

B. Repeats, when ordered and allowable on an Authority to Prescribe, will be handled in the same manner as those issued for standard N.H.S. prescriptions.

Repeat Authorisations

29. Where repeats are allowable a benefit may be supplied on a repeat authorisation only when it is presented with a duplicate prescription to which it is duly related and it is indicated that the pharmaceutical benefit to be supplied has not already been supplied the number of times directed in the prescription.

Regulation 24

30. Where a prescription is endorsed 'Regulation 24' (see paragraph 18), an approved chemist is authorised to supply the benefit and the repeats of that benefit at the one time. He should not complete a repeat authorisation form. Only one professional fee is payable for the total supply.

Receipts

31. Upon the supply to a person of a benefit by an approved chemist, that person shall sign and date a receipt for that benefit on the prescription form or repeat authorisation, as the case may be. If the person taking delivery of the benefit is not the person for whose treatment the prescription was written, he shall in addition endorse the prescription form or repeat authorisation with his address. Not in any circumstances must a person give or an approved chemist demand a receipt until supply of the benefit has actually been made.

32. Where a benefit is supplied through the post, by rail, or other means of transport, and it is impracticable to obtain a receipt, the approved chemist must certify on the prescription or repeat authorisation, as the case may be, that he has supplied the pharmaceutical benefit, the date on which the supply was made and particulars of the means of supply. Where a benefit is supplied prior to the presentation of a prescription (urgent cases see paragraphs 19-20) or to a person who cannot read or write, or who is unable to write, the approved chemist should sign and date a statement on the prescription or repeat authorisation, indicating the circumstances of supply.

C. CHARGES TO PATIENTS

Patient's Contribution

33. An approved chemist may in respect of each supply by him whether on a prescription or repeat authorisation, charge the person to whom the pharmaceutical benefit is supplied an amount not exceeding \$1 in respect of general patients and 50c in respect of a prescription which shows an S.H.B. entitlement number. A charge is not to be made for the supply of a pharmaceutical benefit on a prescription which shows the pension number as appearing on the P.M.S. entitlement card of a pensioner or a repeat authorisation on which is written the patient's pension number. Where a solvent may be prescribed as part of a benefit, only one prescribed charge may be made for each supply of the benefit.

34. The approval of a chemist is subject to the conditions that—

- (a) he will not, by advertisement, notice or otherwise, state or indicate that he is willing to supply all or any pharmaceutical benefits to all or any persons (except pensioners) without charge or for a charge of less than \$1 for general patients or 50c for persons with an S.H.B. entitlement for each supply;
- (b) he will clearly indicate in any statement made by advertisement, notice or otherwise, that any offer to supply drugs or medicinal preparations without charge or at a reduced charge does not apply to the supply of pharmaceutical benefits;
- (c) he will not follow a practice of supplying all or any pharmaceutical benefits to all or any persons (except pensioners) without charge or for a charge that is less than \$1 in respect of general patients and 50c in respect of patients with an S.H.B. entitlement;
- (d) he will not enter into an agreement or arrangement to pay rebates or refunds of the authorised prescription charges nor will he become a party to such agreements.

35. Where a doctor has obtained an authority from the Commonwealth Director of Health to prescribe a quantity greater than the normal maximum quantity (see paragraph 15) the authorised prescribed charges should be made for each supply of the increased maximum quantity.

36. Where a doctor has endorsed a prescription 'Regulation 24' (see paragraphs 18 and 30) the approved chemist should make the relevant prescribed charge for the original and the same charge for each repeat that would normally be needed to make up the total supplies. For example, if the prescription ordered two repeats, a charge of \$3 should be made to a general patient and \$1.50 to a patient with S.H.B. entitlement.

37. Where a prescription is written for a benefit for which the dispensed price at the date of supply is equal to or less than \$1 in respect of general patients and 50c in respect of patients with an S.H.B. entitlement, the prescription should be dispensed as a private prescription unless it has been written for a pensioner. This also applies to pre-

scriptions endorsed 'Regulation 24' (see paragraphs 18 and 30), and for which the price of the maximum quantity of the benefit is less than the authorised charges specified above.

After Hours

38. A late fee may be charged for the supply of pharmaceutical benefits outside normal trading hours. Only one late fee may be charged for each person at any one time, irrespective of the number of prescriptions presented. Late fees are recoverable from the patients concerned and not from the Commonwealth. Allowable late fees are—

- (a) after trading hours but before 11 p.m.—25c;
- (b) between 11 p.m. and the commencement of trading hours on the next day—50c.

Delivery

39. A charge equal to the cost of delivering may be made if supply by delivery is made at or to a place other than the approved chemist's pharmacy.

Responsibility

40. It is the patient's responsibility to meet any charge lawfully demanded and an approved chemist may refuse to supply a pharmaceutical benefit if payment of a charge is not made.

41. An approved chemist or a doctor is not entitled to demand or receive a payment (other than a payment from the Commonwealth) or other valuable consideration in respect of the supply of a pharmaceutical benefit except as set out herein.

D. MISCELLANEOUS

Premises

42. Approval to supply pharmaceutical benefits is granted to a chemist in respect of particular premises. Benefits may be supplied from these premises only.

Approved Doctors, Friendly Societies

43. Doctors approved to dispense pharmaceutical benefits should follow the procedures explained in these Notes unless otherwise indicated. Friendly Society Dispensaries should follow the procedures subject to additional instructions made available to them.

Standards

44. An approved chemist should not supply as a pharmaceutical benefit a substance that does not conform to the standards of composition or purity prescribed, or that has as an ingredient a substance that does not conform to those standards. The standards which are applicable to pharmaceutical benefits are—

- (a) in the case of British Pharmacopoeia or British Pharmaceutical Codex drugs or medicinal preparations, those standards set out in the Therapeutic Goods Act;

- (b) in the case of drugs or medicinal preparations contained in the Australian Pharmaceutical Formulary, or earlier editions of the British Pharmacopoeia or British Pharmaceutical Codex, those standards specified in the particular edition in relation to the drug or medicinal preparation.

References

45. Monographs in the British Pharmacopoeia and previous editions, the British Pharmaceutical Codex, and the Australian Pharmaceutical Formulary, and items listed in the Prescribers' List are identified in this book by the letters BP, BP 1963, BP 1958, BP 1953, BP 1948, BP 1914, BPC, BPC 1963, BPC 1959, BPC 1954, BPC 1949, APF, APF 1964, APF 1955, APF 1947, or PL as appropriate.

Measures

46. Except where stated, weights and measures other than metric, represented or expressed in the Schedule of Benefits, or in a prescription, shall be deemed to be apothecary's weights and measures. When the abbreviation oz is used in relation to an extemporaneous preparation it refers to a 480 gr ounce.

Hours of Supply

47. A person is entitled to be supplied with pharmaceutical benefits during normal trading hours established by or under the law of the State or Territory when he presents a valid prescription and pays any charge applicable. When the prescription is marked 'urgent' and initialled by the doctor, it is obligatory for the approved chemist to make supply at his pharmacy at any hour.

48. An approved chemist shall, at all times, keep prominently displayed, at each of the premises in respect of which he is approved, a notice setting out his normal trading hours for the supply of pharmaceutical benefits.

Proper Stocks to be Kept

49. An approved chemist shall, as far as practicable, keep in stock an adequate supply of all drugs and medicinal preparations that he may reasonably be expected to be called upon to supply as pharmaceutical benefits, or as ingredients of pharmaceutical benefits.

Statement of Stocks

50. An approved chemist may be required to furnish, within a specified time and in accordance with a form supplied to him, a signed statement setting out particulars of stocks of drugs or medicinal preparations that are in his possession or under his control immediately before the date on which the statement is signed. This refers only to drugs and medicinal preparations that are pharmaceutical benefits or are capable of being used as ingredients in pharmaceutical benefits.

Retention of Documents

51. Without affecting the requirements of the law of a State in regard to drugs of addiction or restricted drugs, every approved chemist is required to retain in his possession for not less than one year from the date on which the pharmaceutical benefits were supplied—

- (a) the duplicates of prescriptions which do not bear repeat instructions;
- (b) the duplicates of repeat authorisations;
- (c) in the case of an approved chemist making supply on the last occasion of supply, the duplicates of prescriptions that bear instructions to repeat; and
- (d) the duplicates of order forms presented in connection with Doctor's Bag Supplies.

Suspected Forgery

52. If an approved chemist is not satisfied that the signature on a prescription form is that of a medical practitioner, or suspects that the prescription has been forged or fraudulently obtained, he is entitled, before supplying the benefit, to obtain a statement from the person obtaining the benefit. However, in the case of Emergency Drug (Doctor's Bag) order forms particular requirements are set out in paragraph 22.

Sale Copies

53. Copies of the National Health Act and Regulations are available from the Commonwealth Sub-Treasury in each capital city.

54. Additional copies of this publication may be purchased from the Commonwealth Department of Health in each capital city. Price and order form will be furnished upon inquiry.

55. Inquiries regarding pharmaceutical benefits may be made at the Office of the Commonwealth Director of Health in each capital city.

CODING AND SUBMISSION OF PRESCRIPTIONS—

PROCEDURE BY APPROVED CHEMISTS

A. INTRODUCTION

56. The pricing of valid prescriptions, repeat authorisations and Doctor's Bag Order forms and the calculation of the total amount payable for each claim are carried out by means of an electronic computer which operates on coded information provided by the approved chemist in respect of each pharmaceutical benefit supplied under the National Health Act.

57. The system is designed to enable approved chemists to prepare claims correctly with a minimum of work but it is, however, essential that the instructions be followed carefully and without modification. The inclusion in claims of incorrectly coded or otherwise defective prescriptions can be expected to interrupt processing and delay payments.

58. The interest and co-operation of approved chemists in ensuring that claims are always correctly prepared is invited and would substantially assist this Department to maintain a programme of prompt and satisfactory payments.

B. GENERAL

Time for Lodgment of Claims

59. Claims for pharmaceutical benefits must be lodged at the office of the Commonwealth Department of Health in your capital city within thirty days of the last day of the month in which the benefits were supplied, unless the approval of the Commonwealth Director of Health has been obtained otherwise. Claims for pharmaceutical benefits supplied more than six months prior to the date of claiming will not be accepted for computer processing, but will require manual pricing of prescriptions and preparation of tally sheets and claim forms by the chemist. *Approved chemists desiring to submit such claims should contact the office of the Commonwealth Director of Health for instructions regarding the preparation of the claims and the necessary forms.*

Documents to be Submitted

60. A claim for pharmaceutical benefits consists of:

- (i) A completed claim form PB1 (Treasury Form 12).
- (ii) The originals of all prescriptions, repeat authorisations, as well as special authority prescriptions for benefits supplied to the general public. These should be together in a separate bundle from the pensioner prescriptions.
- (iii) The originals of all prescriptions, repeat authorisations, as well as special authority prescriptions for benefits supplied to pensioners. These should be together in a separate bundle from the general benefit prescriptions.

NOTE.—Generally, prescriptions in each bundle should be submitted in serial number order. The exception to this is where an approved chemist *has elected to price* extemporaneously prepared prescriptions (see paragraphs 70 and 89). These prescription forms should be placed at the back of the relevant bundle irrespective of serial numbers and the fact that other prescriptions may appear on the same form.

- (iv) The original orders for Emergency Drug (Doctor's Bag) supplies in a separate bundle.
- (v) Repeat authorisations for an injectible and the related solvent must be stapled together.

Completion of Claim Form

61. Particulars of claimant's name, approval number, address, reference number, zone and zone factor and month of dispensing should be entered in the spaces provided on the claim form PB1

(Treasury Form 12). It is important that these particulars agree entirely with the latest written information held by this Department, i.e., application for approval form or later letter. In the event of discrepancies, payment will necessarily be delayed pending clarification.

62. The numbers to be entered on the claim form are the first and last serial numbers given to items on the General and Pensioner Benefits and Emergency Drug (Doctor's Bag) forms respectively (see paragraph 68). The last numbers should be the total numbers of these categories.

63. Please note that no entry of the amount of the claim is required—this will be calculated by computer after the prescriptions have been individually priced.

64. The declaration on the claim form must be signed by the approved person unless an authority for another person to do so has been sent by the approved person to the Commonwealth Director of Health in the State concerned.

Prescription Identifying Numbers

65. In addition to a serial number (see paragraph 68) each pharmaceutical benefit prescription dispensed must be given a number which identifies it specifically. Prescription book numbers are preferable but any other series which will meet the purpose may be used, provided that the chemist's approval number is not a component of such numbers. Please note that these numbers are to be entered in the Coding Stamp (see paragraph 81).

66. Further, in cases where an approved chemist allots an identifying number to a repeat authorisation as distinct from the original prescription number allotted by the approved chemist issuing the repeat authorisation, he should enter this new identifying number in the appropriate coding box pre-printed on the front of the form.

Pharmacy Stamp

67. Before supply of benefit each prescription form and repeat authorisation form should be endorsed with the name of the approved person and his approval number. This information may be stamped, written or typed.

Serial Numbering of Prescriptions, Repeat Authorisations and Emergency Drug (Doctor's Bag) Order Forms

68. Prescriptions dispensed each month should be serially numbered commencing at—

- (a) 1 for general prescriptions (which may include prescriptions dispensed for S.H.B. persons). For the S.H.B. prescriptions the serial number should be prefixed by the letter 'H'.
- (b) P1 for pensioner benefits; and
- (c) D1 for Emergency Drug (Doctor's Bag) supplies.

Each Doctor's Bag item should be given a serial number e.g., if there are five items on the first form dispensed for the month the first item on the second form dispensed for the month will be D6.

Standard Formulae List of Extemporaneous Preparations

69. Included in Section 4 is a comprehensive list of pre-priced extemporaneous preparations. The list is comprised of formulae taken from formulary in common use. This list is referred to in these notes as the Standard Formulae List. Each preparation is identified with a four figure code number.

Special Provisions Governing Payment for Extemporaneous Prescriptions Outside the Standard Formulae List

70. An approved chemist may elect to price out these prescriptions. Once made, however, such an election cannot be varied for a period of three months and applies to all extemporaneously dispensed formulae for which there are no four-figure Codes in the Standard Formulae List.

71. Unless he so elects, the approved chemist will be paid at an average reimbursement rate for these prescriptions. Under this system, payment is made on the basis of an average 10G/ml or unit rate applied to the category of preparation concerned, i.e., the price will be ascertained by multiplying the appropriate 10G/ml or unit rate by the number of 10G/ml units supplied and adding container and professional fees. For example an 80ml mixture would be priced at eight times the average 10ml rate for mixtures, plus container and professional fee. Notwithstanding that an approved chemist is accepting the average price for non-pre-priced prescriptions, he may price out 'exceptional' prescriptions and code for reimbursement at that price (see paragraph 76).

72. The average 10G/ml or unit rate may vary from month to month but the rate for a particular prescription will be that applying to the month in which it was dispensed.

73. By agreement with the Pharmacy Guild of Australia the average 10G/ml or unit rates are determined as in paragraph 74.

74. Each month the total number of 10G/ml or units of each type of pre-priced extemporaneous preparation claimed for will be ascertained for each State, together with the total values minus container and professional fees. From these figures an average 10G/ml or unit rate will be calculated for each type of preparation for each State. This rate will be used as the rate for calculating prices for the prescriptions dispensed in the succeeding month. It should be noted that prescriptions ordering a combination of standard preparations also fall outside the scope of the Standard Formulae List and therefore are subject to this section.

75.—(a) Any variant to a formula included in the Standard Formulae List (addition and deletion of an ingredient or variation of dose up or down) takes the formula dispensed outside the Standard Formulae List and it becomes subject to this section, i.e., it cannot be identified with the code number of the formula which it resembles.

(b) Where an approved chemist is accepting the average price for non-pre-priced prescriptions, and where an ingredient is added to a standard formula and the recovery price for the standard formula

plus additive under the average price system is less than that for the standard formula alone, the approved chemist may code that prescription as though it were a standard formula item.

76. Exceptional prescriptions are those prescriptions which if priced out would have a value (including container and professional fee) equal to or greater than twice the recovery price (including container and professional fee) on an average price basis.

C. PROVISION OF CODED INFORMATION BY AN APPROVED CHEMIST

77. The approved chemist will enter relevant information on each document he submits in support of his claim. The information to be entered will depend upon the type of document, i.e., original or repeat supply, Emergency Drug (Doctor's Bag) Order form, etc., and on the category of prescription, i.e., ready prepared or extemporaneously prepared. The approved chemist is not required to determine eligibility for minor or bulk pack payment nor is he required to endorse the prescription 'Ex M.P.' Bulk Pack eligibility will be assessed by the computer.

Code Numbers for Preparations which are Pre-priced

78. A unique four-figure code number is shown for:

- (i) each form and strength of every ready prepared benefit (Sections 2 and 3, Schedule of Benefits);
- (ii) each standard formula preparation listed in the Standard Formulae List.

79. An exception to this occurs in the use of packed lines where the presence or otherwise of 'Directions for Use' affects the price. Two separate numbers are therefore shown for each packed line. The first code number is to be used where the prescriber has not included specific directions for use in his prescription, and the second will be used when such directions are included.

Code Numbers for Extemporaneous Preparations which are not pre-priced

80. Two-figure code numbers representing each type of extemporaneous preparation, e.g., mixtures, ointments, etc., are shown in the Table of Codes, Section 4 (green pages) of the Schedule. These two-figure codes are to be used by the approved chemist in coding those prescriptions where a doctor has either specified the individual ingredients of a preparation or ordered a combination of standard formulae or has varied in any way a preparation included in the Standard Formulae List, and the approved chemist has elected to accept an average price (see paragraph 71). Where the approved chemist has elected to price out such prescriptions then action as outlined in paragraph 89 should be taken.

Coding Stamp

81. One stamp is provided for coding both Ready Prepared Benefits and Extemporaneously Dispensed Benefits. This stamp provides spaces for coded information on original prescription forms. Repeat authorisation forms and Emergency Drug (Doctor's Bag) Order forms currently on issue have printed coding spaces, and special authority prescriptions are coded by this Department before issue to medical practitioners.

82. Stamp imprints should be placed preferably on the extreme left of the front side of the prescription form. Many doctors use prescription forms which provide space suitable for this purpose, but when there is insufficient area on the front of the form the stamp should be placed on the left-hand side on the back. It should be noted that coding stamps must be placed either **all on the front** or **all on the back** of an individual form. **In no circumstances should the stamp imprint appear on both the back and front.**

83. Doctors who so desire may obtain prescription forms which provide space for the coding stamp and for the patient's or agent's receipt on the face of the form.

84. Where there is insufficient space either on the front or the back of the form for the coding stamp, the coding should be on a slip of paper firmly attached to the form.

85. This stamp will be used for all pharmaceutical benefits—

S	
C	
Q	
B	R
No.	

Coding of Ready Prepared Benefits

86. 'S'—Serial Number (see paragraph 68).

'C'—Is the appropriate code number. All code numbers are shown in the Schedule of Benefits for Approved Chemists beside the benefits to which they refer. These numbers range from 1000 to approximately 3000.

'Q'—Quantity. The number of units dispensed, e.g., capsules, tablets, tins, vials, tubes, etc., is to be entered in the stamp imprint. Only the appropriate number should be shown. The type of dispensing unit should not be specified.

For Regulation 24 prescriptions, the quantity actually supplied should be entered; that is, the total of the original quantity plus the quantities ordered as repeats. (Note next paragraph.)

The dispensed quantity of **PACKED LINES** and **PACKS NOT TO BE BROKEN** should never be expressed as a volume or weight but always in those

terms in which the maximum quantity is expressed in column 3 of Section 2 or Section 3 of the Schedule; e.g., a prescription ordering 200ml of a packed line should be coded with a quantity of '1' and not '200'.

For all Regulation 24 prescriptions, the letter 'X' should be entered on the stamp imprint immediately after the quantity.

'B'—Brand Ordered. Where a doctor orders a particular brand either by proprietary name or brand, the code letters of the manufacturer should be entered beside the letter 'B'. Where a particular brand is *not* ordered **THIS SPACE MUST BE LEFT BLANK.**

'R'—Repeats. Where repeats (up to the allowable maximum) are ordered on an original prescription, the number so ordered should be entered in this space, **including those cases where supply has been made under Regulation 24.**

'No.'—Prescription identification number (see paragraph 65).

Coding of Extemporaneously Dispensed Benefits Included in the Standard Formulae List

87. 'S' Serial Number (see paragraph 68).

'C' Code Number obtained from the Standard Formulae List where one is shown. These numbers range from 7000 to 9999.

'Q'—Quantity dispensed. In specifying the quantity of a standard formula for which a code appears in the Standard Formulae List the following rules should be adhered to:

(a) Where the doctor orders a whole number of ounces that number is to be entered after the letter 'Q' in the stamp imprint in plain figures (not Roman numerals). The ounce sign or similar identification should not be shown.

(b) Where fractions of an ounce occur the quantity must be expressed as a decimal fraction of an ounce, e.g., 2 fluid ounces 240 minims is to be expressed as 2.5. An extemporaneously dispensed eye ointment of 60 grains will be shown as 0.125. No ounce or drachm sign should be used and no other means of expressed parts of an ounce will be acceptable to the system.

(c) In the case of extemporaneous preparations ordered by number of units and not by weight or measure, such as extemporaneously prepared capsules, suppositories, pessaries and individually wrapped powders, the number of units supplied should be entered. Wastage where applicable will be calculated by the computer. Details of the type of unit dispensed should *not* be pro-

vided. The number of units only is required. Where the supply of a standard preparation is made under Regulation 24, the letter 'X' should be entered after the quantity.

(d) If quantities are prescribed in the metric system, the number of millilitres or grammes suffixed by ml or G should be entered.

'B'—This space must be left blank when coding extemporaneously dispensed prescriptions (except for provision made in paragraph 88).

'R'—Repeats. Where repeats (up to the allowable maximum) are ordered on an original prescription, the number so ordered should be entered in this space, including those cases where supply has been made under Regulation 24.

'No.'—Prescription Identification Number (see paragraph 65).

Dropper Containers

88. Dispensed prices for extemporaneously prepared eye drops, ear drops and nose drops include the cost of a polythene dropper container. Where a glass dropper container is specified by the prescriber, payment for same should be claimed by placing the letter 'G' in the brand space of the coding stamp.

Coding of Extemporaneously Dispensed Benefits which are not listed in the Standard Formulae List

89. In the case of formulae for which a code number is not shown claimants may elect either to receive an average 10G/ml or unit rate for the type of preparation with provision to price exceptional prescriptions (see paragraph 76) or to calculate the cost of ingredients, containers and professional fee manually (see paragraphs 70-75). These arrangements have been agreed between the Department and the Pharmacy Guild of Australia. No notice to the Department will be necessary if payment on the average reimbursement rate system is desired, but election must be made formally if the approved chemist desires to price these prescriptions individually before submission. Once made, such an election will apply to all non-pre-priced extemporaneous preparations and cannot be altered for a period of three months. The approved chemist will notify the Department when changing from 'pricing elected' to 'acceptance of average rate'. It should be noted that prescriptions which call for a variation to one of the formulae listed in the Standard Formulae List or combinations of Standard Formulae fall into this category and are not to be identified with the code number of the formula in the Standard Formulae List which they resemble. Coding of Standard Formulae with additives for approved chemists accepting average rate, is covered in paragraph 75 (b).

Action to be taken when an Approved Chemist elects to be paid on an average price basis

90. (a) Coding of prescriptions to be reimbursed on an average price basis.

- (i) Enter the serial number, number of repeats ordered (up to the allowable maximum), if any, and the prescription identifying number in the appropriate places on the stamp imprint.
- (ii) Enter the two-figure code for the type of preparation in the code number space. [See the Table of Codes, Section 4 (green pages) for these codes].
- (iii) Where the quantity prescribed is expressed in the metric system enter the number of millilitres or grammes suffixed by ml or G in the quantity space. Where the quantity prescribed is expressed in the imperial system, the number of ounces or units should be entered. Where a fraction of an ounce occurs, it should be expressed as a decimal fraction, e.g., 3 fluid ounces 240 minims should be entered as 3.5. No ounce sign or similar identification is necessary.
- (iv) Where a supply is made under the provisions of Regulation 24, the letter 'X' should be entered after the quantity.

NOTE: The space following the letter 'B' should be left blank (except for provision made in paragraph 88).

(b) Coding of Exceptional Prescriptions as defined in paragraph 76.

- (i) Enter the serial number, number of repeats ordered (up to the allowable maximum), if any, and the prescription identifying number in the appropriate places in the stamp imprint.
- (ii) Enter the two-figure code for the type of preparation preceded by the letter 'V' (indicating that this prescription is priced) in the code number space. [See the Table of Codes, Section 4 (green pages) for these codes.]
- (iii) Enter the calculated price in the quantity space.
- (iv) Where the supply is made under the provisions of Regulation 24 the letter 'X' should be entered after the price.

NOTE: The space following the letter 'B' should be left blank (except for provision made in paragraph 88).

Action to be taken when an Approved Chemist elects to price non-pre-priced Extemporaneous Preparations

91. When the approved chemist has advised the Department of his election to price out these prescriptions he should price all prescriptions in this category in accordance with the pricing principles set out in 'Provisions governing Payments to Approved Chemists for N.H.S. dispensing' (page 15) and—

- (i) enter the serial number, number of repeats ordered (up to the allowable maximum), if any, and the prescription identifying number in the appropriate sections of the stamp imprint;

- (ii) enter only the letter 'V' in the code number space. This indicates that the prescription has been priced out;
- (iii) enter the price he has calculated in the quantity space;
- (iv) where a supply is made under the provisions of Regulation 24, the letter 'X' should be entered after the price.

N.B. No details of type or quantity of preparation are to be shown in the code stamp.

Coding of Repeat Authorisation Forms

92. The approved chemist originating a repeat will not only complete the upper section of the form but will also enter details in the coding box. It will be the responsibility of the approved chemist dispensing the repeat authorisation to ensure that the coding details are correct.

Action by Approved Chemist Issuing the Repeat Authorisation

93. The following information relating to the original prescription is to be entered in the spaces provided:

- (i) Approval number of approved chemist who dispensed the original prescription.
- (ii) Date of the original prescription.
- (iii) The prescription identification number assigned by the dispenser of the original prescription.
- (iv) The number of repeats ordered up to the allowable maximum.
- (v) The number of times the prescription has been dispensed.
- (vi) The code number, quantity and where applicable the brand of the benefit ordered.
- (vii) Repeats on Authority to Prescribe (Form PB15) should be endorsed with the authority number.

94. Where an approved chemist dispenses a supply other than on the first occasion, the information in (i), (ii), (iii), and (iv), will be transcribed from the repeat authorisation which he receives from the patient. These details would have been entered by the approved chemist who issued the form to the patient.

Action by Approved Chemist Dispensing a Repeat Authorisation

95. The approved chemist dispensing the supply will check the information entered in the stamp imprint. The dispensing approved chemist is responsible to ensure the correctness of these entries. It should be noted that:

- (a) The serial number allotted by the approved chemist to the repeat supplied as a \$1.00 general prescription is entered beside the letter 'R' in the box at the top of the form. For repeats supplied to S.H.B. patients, the letter 'H' is entered beside the 'R' in the box. Serial numbers issued in respect of repeats supplied for which

an Authority to Prescribe is required must be prefixed with the letter 'A' in the case of general benefits, ('AH' in respect of prescriptions dispensed for S.H.B. persons), and with the letters 'AP' in the case of pensioner benefits.

- (b) The new identifying number of the Repeat Authorisation is to be entered in the space marked 'No.' in the Coding Stamp Box on the front of the form. (See paragraph 66).

- (c) When the approved chemist issuing the authorisation has entered a code number (for the type of preparation) and quantity in the stamp and the dispensing approved chemist has elected to price such prescriptions instead of accepting the average price, the dispensing approved chemist should strike out the entries and replace them with 'V' and the claimed price or *vice versa*.

Coding of Emergency Drug (Doctor's Bag) Order Forms

96. For each item ordered, enter the serial number, code number of the benefit, quantity supplied and the brand ordered, if any.

D. STATEMENT OF ACCOUNT

97. A Statement of Account will be forwarded in respect of each claim passed for payment. This gives, in addition to the details of payment, the price paid for each benefit or the reason for non-payment. Prescriptions are identified on the Statement of Account by the serial numbers allotted by the claimant and the Item Code number. In the case of non-pre-priced extemporaneously prepared benefits the letter 'V' or the two digit code number for the type of preparation replaces the item code numbers according to whether the prescriptions have been paid on an average price or calculated price basis. Serial Numbers of Emergency Drug (Doctor's Bag) items will be prefixed by the letter 'D', for S.H.B. prescriptions by the letter 'H', and the pensioner prescriptions by the letter 'P'.

98. The reason for non-payment of any item will be indicated by a Code letter. An explanation of the Code employed appears on the reverse side of the Statement of Account.

99. Prescriptions and repeat authorisations which are not acceptable for payment will be returned with the Statement of Account. Other prescriptions appearing on such forms will have been paid and appropriately cancelled before being returned to the approved chemist. Where prescriptions are resubmitted they must be allotted an entirely new serial number and included as a normal part of the next claim.

100. If prescriptions from previous claims are the subject of adjustment to current claims, full details will be shown on the Statement of Account.

101. Where a correctly coded prescription has not been given a serial number by the claimant the

erial number given to the preceding prescription will be used also as a means of reference to the second prescription, i.e., the serial number will appear twice on the Statement of Account with the appropriate prices or rejection codes relating to both prescriptions.

102. Should serial numbers be duplicated they will be shown on the Statement of Account as numbered by the claimant.

103. In the case of a serial number which has not been used or the relevant document not submitted the number will be printed on the Statement of Account together with a code signifying that the document has not been received.

104. The Statement of Account will include a statement reconciling the number of prescriptions claimed for by the approved chemist with the number of prescriptions for which payment has been made.

E. MISCELLANEOUS

Private Prescriptions—General Benefits priced at \$1 or less or S.H.B. prescriptions priced at 50c or less

105. Particularly in the case of broken quantities and bulk pack items, approved chemists will not be in a position to determine whether prescriptions should be submitted for payment or dispensed privately. To overcome this difficulty, all prescriptions for the general public which otherwise qualify as pharmaceutical benefits should be submitted for payment. The computer is programmed to ensure that general benefit prescriptions priced at \$1 or less (50c in respect of prescriptions for persons with S.H.B. entitlement) are excluded.

PROVISIONS GOVERNING PAYMENTS TO APPROVED CHEMISTS FOR N.H.S. DISPENSING

A. GENERAL

106. The pricing principles are identical for prescriptions written for the general public and pensioners.

B. READY PREPARED ITEMS AND P.L. ITEMS

Price where Maximum Quantity Prescribed (R.P. and P.L. Items)

107. The price payable for a benefit is the amount shown in column 5 of the Schedule against that benefit subject to the following provisions—

(a) *Bulk Rate Items (Where two prices are shown)—*

- (i) Where five prescriptions and over of a particular brand are included in a month's claim, payment will be made at the bulk pack rate price for all prescriptions of that brand. Unbranded prescriptions will be counted with the brand

of major usage for the purpose of arriving at the bulk rate qualification and the price payable will be the bulk price for that brand as at the date of dispensing.

- (ii) Where four or less prescriptions of a particular brand have been included in a month's claim the minor pack rate is payable.

It should be noted that the computer has been programmed to determine bulk pack eligibility, so that there will be no need for approved chemists to count prescriptions for bulk pack items or endorse them in regard to supply from a minor pack.

(For special bulk rate provisions see paragraphs 128-135).

- (b) *Packed Lines*—Where the prescription bears specific instructions for use, the price is calculated in accordance with paragraph 110.

- (c) *Injections with required solvent*—Where the words 'solvent required' are included after the form of the benefit, the price payable is the sum of the listed prices for the item and the solvent less 39c (i.e., only one professional fee is payable). Prescribers must indicate volume and number of ampoules of solvent to be supplied.

Price where Broken Quantity Prescribed (R.P. Items)

108.—

- (a) *Bulk rate items (where Bulk Pack Rate applies)*—The method used in ascertaining the price of a quantity other than a maximum quantity is the same as that which has been used in arriving at the price of a maximum quantity from a bulk pack. However, as the price shown in column 5 of Section 2 Schedule of Benefits (white pages) for the maximum quantity already incorporates a breakage allowance, the following action is taken to ascertain the price of a quantity other than the maximum—

- (i) 39c and the container fee for the maximum quantity of that item are deducted from the amount shown in column 5 of the Schedule of Benefits.
- (ii) the amount ascertained in (i) is multiplied by the quantity dispensed over the maximum quantity.
- (iii) the amount ascertained in (ii) is added to the appropriate container fee and the professional fee of 39c.

(b) *Bulk Rate Items (where Minor Pack Rate applies)*—The price is ascertained in accordance with paragraph 108 (e) or 108 (f) as applicable.

(c) *Packed Lines*—The price for the maximum quantity is payable, even when a lesser quantity is prescribed.

(d) *Packs not to be Broken*—Where items packed by the manufacturer under special conditions or for which the maximum quantity has been determined as a single pack are prescribed (see paragraph 111), maximum quantity is to be supplied and the price payable is that for the maximum quantity.

(e) *Ready Prepared Items where Standard Pack coincides with Maximum quantity*—Where the standard pack coincides with the maximum quantity, the price payable for a broken quantity is ascertained as follows—

(i) 39c is deducted from the price shown in column 5 of the Schedule in relation to the benefit.

(ii) To the resultant amount is applied the appropriate wastage percentage ascertained from the Wastage Factor Table shown in paragraph 113.

(iii) The amount ascertained under (ii) is added to a professional fee of 39c and the appropriate container fee.

In no case shall the price payable for a broken quantity exceed the dispensed price shown in column 5 of the Schedule in relation to the maximum quantity of the benefit.

(f) *Ready Prepared Items where Standard Pack does not coincide with Maximum Quantity (i.e., where an asterisk is shown against the price)*—In cases where the standard pack does not coincide with the maximum quantity an asterisk has been placed in column 5 of the Schedule beside the price shown for the benefit concerned. In such cases the standard pack rate is set out in the Table shown in Section 6 (blue pages) of the Schedule. The price payable for the quantity supplied is ascertained as follows:—

(i) To the standard rate is applied the appropriate wastage table percentage ascertained from the Wastage Factor Table shown in paragraph 113.

(ii) The amount so ascertained is added to a professional fee of 39c and the appropriate container fee.

In no case shall the price payable for a broken quantity exceed the sum of the standard pack rate and 39c.

(g) No container fee is payable where the quantity of benefit ordered and supplied is more than the quantity contained in the standard or non-standard packs.

Price for Unbranded Prescriptions

109.—

(a) *Bulk Rate Items (where Bulk Pack Rate applies)*—

(i) Prescriptions which do not specify a brand are treated as if written for the brand of major usage (see paragraph 107 (a) (i)).

(ii) Where two or more brands equally qualify as the brand of major usage during the month, prescriptions which do not specify a brand are counted with that brand which is the lowest in price of these brands.

(iii) Where no prescriptions are written for a brand of the item during the month, unbranded prescriptions are payable at the lowest bulk pack rate shown in column 5 of the Schedule against that item.

(b) *Bulk Rate Items (Where Minor Pack Rate applies)*—Where the MINOR PACK rate applies (see paragraph 107 (a) (ii)), the lowest price shown in column 5 in relation to the minor pack price for that item is payable.

(c) *Other Ready Prepared Items*—Where a standard pack price applies, the lowest price shown in column 5 of the Schedule in relation to that item is payable.

Packed Lines

110. The undermentioned packed lines are expected to be supplied under the original label when prescribed in the maximum quantities shown in the Schedule of Benefits and therefore do not attract a professional fee. However, where the prescription bears specific instructions for use, then the item is to be labelled. In such cases, payment will be made on the same basis as for other ready prepared items.

When the quantity ordered does not correspond with a pack size listed, then the price for the next higher original pack listed is payable, even when the prescription orders and the chemist dispenses a lesser quantity. This procedure also applies where the approved chemist's own pack is supplied.

Aluminium Hydroxide Gel Mixture
Boric Acid Powder
Cascara Liquid Extract
Cod Liver Oil
Cod Liver Oil Emulsion
Copper Sulphate Diagnostic Compound Tablets
Ferrous Phosphate Compound Syrup
Glucose Indicators

Glucose and Ketone Indicator
Glycerin
Glycerin Suppositories

Magnesium Sulphate Crystals
Paraffin, Liquid
Paraffin, Emulsion
Saccharin Tablets
Seidlitz Powder
Surgical Cement
Tragacanth Indian (Gum Karaya)
Wool Alcohols, Ointment
Wool Fat, Hydrous (Lanolin)

These items are indicated by a dagger (†) in the Schedule of Benefits.

Unbroken Packs to be Supplied

111. The maximum quantity of certain forms of benefits such as eye drops and oral suspensions has been determined as a single pack corresponding to the manufacturer's pack. Where a prescription calls for a quantity less than the manufacturer's pack, the maximum quantity should be dispensed and claimed from the Commonwealth.

These items are indicated by a double dagger (‡) in the Schedule.

Wastage Table Percentage for Ready Prepared Prescriptions

112. The wastage table shown below is used in ascertaining the price payable for quantities dispensed from the Standard Pack. (Refer paragraph 108 (e) and (f) above.

113. The appropriate wastage table percentage is ascertained as follows:—

- The percentage that the quantity supplied bears to the number contained in the standard pack is determined;
- Where the percentage determined in subparagraph (a) coincides with a percentage listed in Column A of the Wastage Factor Table, the percentage used is the relative figure shown in Column B;
- Where the percentage determined in subparagraph (a) does not coincide with a percentage in Column A, then the nearest upward percentage in Column A applies, and the percentage used is the relative figure shown in Column B.

For example, suppose that 24 tablets are supplied and that the number in the Standard Pack is 100. Thus 24% of the number contained in the Standard Pack is supplied. As this percentage does not appear in Column A the next higher (i.e., 25%) is used. Reading down from 25% to Column B, the wastage table percentage is found to be 38%.

WASTAGE FACTOR TABLE

Column A ..	5	10	15	20	25	30	35	40	45	50
Column B ..	10	18	26	32	38	44	50	54	58	62

Column B ..	66	70	74	78	82	86	90	94	98	100

Prescribers' List Items

114. The price payable for the supply of the maximum quantity of extemporaneous preparations included in the Prescribers' List is shown in the Standard Formulae List.

C. EXTEMPOREANEOUSLY PREPARED PRESCRIPTIONS

Pricing Prescriptions Not Pre-priced

115. The following are the principles applied in determining the prices of all pre-priced extemporaneous formulae shown in the Schedule. They also apply where a chemist elects to price out extemporaneous prescriptions outside the Standard Formulae List.

116. The amount payable is ascertained as the sum of—

- the recovery price of each ingredient as shown in the Schedule of Benefits (Drug Tariff);
- the price of the appropriate container as shown in Section 4;
- a professional fee of 64c.

Pricing Ingredients Written in the Metric System

117. Where the quantity is not specified in the Drug Tariff, the recovery price may be ascertained as follows—

- determine the basic pricing unit relative to the quantity by reference to the following table:—

Quantity	Basic Pricing Unit
Up to 50mg (minimum price)	100mg price multiplied by 0.5
Over 50mg and up to and including 700mg	100mg price
Over 700mg and up to and including 1G	price as 1G
Over 1G and up to and including 7G	1G price
Over 7G and up to and including 10G	price as 10 G
Over 10G and up to and including 80G	10G price
Over 80G and up to and including 90G	price as 80G
Over 90G	100G price

- ascertain the recovery price of the basic pricing unit by the application of the following quantity divisors to the recovery price shown for the ingredient in the Drug Tariff—

100G price is 500G price divided by 5 or 1kg price divided by 10.
10G price is 100G price plus 12½% divided by 10.
1G price is 10G price plus 25% divided by 10.
100mg price is 1G price plus 25% divided by 10.

(c) ascertain the recovery price by multiplying the price of the basic pricing unit, as ascertained in (b), by the fraction that the quantity bears to the basic pricing unit.

(d) for pricing purposes the quantity is to be taken to the next 50 milligrams or 0.5 millilitres.

Pricing Ingredients Written in the Imperial System

118. Where the quantity is not specified in the Drug Tariff, the recovery price may be ascertained as follows—

(a) determine the basic pricing unit relative to the quantity by reference to the following table:—

<i>Quantity</i>	<i>Basic Pricing Unit</i>
Up to and including 1 grain	1 grain price
Over 1 grain and up to and including 5 grains	5 grains price
Over 5 grains and up to and including 10 grains	10 grains price
Over 10 grains and up to and including 137 grains	1 drachm price
138 grains and up to and including 3.74 ounces	1 ounce price
Over 3.74 ounces	4 ounces price

(b) ascertain the recovery price of the basic pricing unit by the application of the following divisors to the recovery prices calculated from the price of the ingredient in the Drug Tariff—

Ounce price is 10G/ml price multiplied by 3.

Four ounce price is 100G price multiplied by 1.25.

Four fluid ounce price is 100ml price multiplied by 1.1.

Drachm price is ounce price divided by 7.

10 grain price is drachm price divided by 5.

5 grain price is drachm price divided by 9.5.

1 grain price is 5 grain price divided by 4.5.

(c) where no 10G/ml price is shown, the ounce/fl. oz price is the 1G/ml price multiplied by 24.

(d) ascertain the recovery price by multiplying the price of the basic pricing unit, as ascertained in (b) by the fraction that the quantity bears to the basic pricing unit (except for the quantities from 120 grains to 137 grains inclusive which are priced at twice the drachm price, and from 10 grains to 12 grains inclusive which are priced as 12 grains).

119. Where a fraction of a grain occurs, the quantity is to be taken up to the next whole grain (i.e., 2.4 grains is taken as 3 grains). Where a fraction of a minim occurs the quantity is to be taken up to the next whole minim.

Miscellaneous Pricing Rules

120.—

(a) The minimum recovery price for any ingredient is one cent.

(b) Where a fraction of a cent occurs in any price for a quantity specified in the imperial system of weights and measures, that price is to be taken to the next cent upwards.

(c) Where a fraction of a cent occurs in any price for a quantity specified in the metric system of weights and measures, that price is to be taken to the nearest cent, a half cent being taken up to the next cent.

(d) The amount payable for a quantity of an ingredient or preparation shall not exceed the amount which would be payable for a greater amount of that ingredient or preparation.

Individual Powders, etc.

121. For individual powders, five per cent of the quantity supplied on a prescription is payable as an additional amount (i.e., the price for 105% of the quantity supplied is payable).

122. For suppositories and pessaries where eleven or less are supplied on a prescription, the approved chemist will receive payment for an additional one. If twelve or more are supplied, the approved chemist will receive payment for an additional two.

Pricing Prescriptions where Additional Ingredients have been Added to a Specified Formula

123. The amount payable for a prescription which comprises a vehicle which is specified under a particular name, and an additional specified ingredient or ingredients shall be calculated in accordance with paragraphs 124 and 127.

124. Where the vehicle is a single liquid ingredient and one or more solid ingredients are added, displacement of the vehicle by solids shall be disregarded and the amount payable shall be calculated in accordance with paragraph 116.

125. Where the vehicle is a single liquid ingredient and one or more liquids are added, the amounts payable for the ingredients shall be the sum of:—

(a) the recovery price of the added ingredients, calculated in accordance with paragraph 117 or 118; and

(b) the recovery price of the quantity of the vehicle calculated in accordance with paragraph 117 or 118.

126. Where the vehicle is compounded from two or more ingredients and one or more solid ingredients are added, displacement of the vehicle by the solids shall be disregarded and the amount payable for the ingredients shall be the sum of:—

(a) the recovery price of the added ingredients, calculated in accordance with paragraph 117 or 118; and

- (b) the recovery price of each ingredient of the vehicle calculated in accordance with paragraph 117 or 118.

127. Where the vehicle is compounded from two or more ingredients and one or more liquid ingredients are added, the amount payable for the ingredients shall be the sum of:—

- (a) the recovery price of the added ingredients, calculated in accordance with paragraph 117 or 118; and
(b) the recovery price of the quantity of vehicle, this amount being the sum of the recovery prices for each ingredient of the vehicle in such quantity as calculated in accordance with paragraph 117 or 118.

D. PROVISIONS RELATING TO BULK RATES

High Velocity Items

128. Special pricing arrangements apply to certain high velocity items. For each of these items, two sets of prices are shown—one ex Bulk Pack and one ex Minor Pack.

Purchase Pack Size

129. An approved chemist may buy in any pack size he chooses, but reimbursement for the supply of the specified drugs with high velocity turnover is subject to the Bulk Rate pricing provisions.

Application to Brands

130. The Bulk Rate provisions take into account the different usages an approved chemist may have for different brands of an item to which the Bulk Rate provisions apply. Accordingly, an approved chemist may be reimbursed at the Minor Pack rate for one brand of an item and at the Bulk Rate for another brand of the same item.

131. For the purposes of paragraph 107 (a) each prescription counts as one irrespective of quantity prescribed.

Loss on Bulk Packs

132. The Commonwealth, subject to the provisions set out in this section, will indemnify the approved chemist against loss on accepted 'Bulk Rate' items directly due to—

- (a) the removal of the item from the list of items to which Bulk Rate prices apply;
(b) out of date stock.

133. Commonwealth payments to approved chemists to cover any such loss shall be based on the following formula—

$$\frac{\text{Quantity held by approved chemist}}{\text{Quantity in Unbroken Bulk Pack}} \times \frac{\text{Actual cost to approved chemist of Bulk Pack}}{\text{Bulk Pack}}$$

Conditions Subject to Which Loss Payments will be made

134. Payment of any amount for loss is subject to the following provisions—

- (a) The approved chemist must buy the item in the Bulk Pack;
(b) The approved chemist must ensure, where possible, that all stocks of bulk packs which he might purchase have expiry dates at least six months ahead of the date of purchase;
(c) The Commonwealth's liability is limited in relation to each pharmacy to the purchase, at cost, of one Bulk Pack of each of the items in respect of which loss has occurred;
(d) The Commonwealth will not, under any circumstances, be liable for payment in respect of loss on stock for causes other than those shown in paragraph 132 above;
(e) The Commonwealth shall take possession of any stock before a payment for loss is made in respect thereto.

Claims for Loss

135. Where after one month from the date of first supply from a Bulk Pack an approved chemist wishes to claim for loss on the remaining portion of that Bulk Pack, he should apply on Form PB 12 to the Commonwealth Director of Health, setting out details of the code number, name and strength or size, size of pack and quantity remaining, date of purchase of Bulk Pack and date of first dispensing therefrom. Upon receipt of such application the Commonwealth Director of Health will advise the action to be taken with the residue.

E. GENERAL

Professional Fees and Containers

136. The amounts payable by way of professional fees and container charges for both ready prepared and extemporaneously prepared preparations are set out in Sections 6 and 4 respectively of the Schedule.

Pricing Dates

137. For pricing purposes the operative dates are—

- (a) for extemporaneously prepared benefits—the first day of the month preceding the four monthly period during which the benefits are dispensed.
(b) for ready prepared benefits—the first day of the month preceding the month during which the benefits are dispensed.
(c) for containers—
(i) for extemporaneously prepared benefits—the first day of the month preceding the four months during which the benefit is dispensed;
(ii) for ready prepared benefits—the first day of January each year.

Zone Allowances

138. An additional amount is payable in respect of each pharmaceutical benefit in specific zones throughout the Commonwealth. The zone allowance is ascertained by multiplying the number of prescriptions dispensed by an amount in cents per prescription.

139. Each approved chemist is notified of the zone allowance, if any, which applies to the prescriptions he dispenses.

Supplies of Stationery

140. Claim Forms, Repeat Authorisations, etc., are available from the Commonwealth Director of Health in each State.

SCHEDULE OF BENEFITS

Operative as from 1 August 1972

SECTION 2

RESTRICTED BENEFITS

All restricted items are printed in red.

The maximum quantity and/or number of repeats in respect of any item shown in the Schedule may be varied by the Commonwealth Director of Health when issuing an authority to prescribe (Form PB15). The quantity and number of repeats shown on the authority shall be supplied. Payment will be made on the basis of the price shown for that item in the Schedule. (See paragraphs 15, 16, and 35 of Section 1 - Explanatory Notes (lemon pages)).

SYMBOLS USED IN THE SCHEDULE

An asterisk (*) against the price of a benefit indicates that the manufacturer's pack does not coincide with the maximum quantity.

A dagger (/) in front of the form of an item and in the price column indicates a packed line which is to be supplied under the original label when prescribed except where the prescription bears specific instructions for use, in which case the item is to be labelled.

A double dagger (≠) in the maximum quantity column indicates an item for which the maximum quantity has been specially determined to correspond to the manufacturer's pack and the manufacturer's original pack will be supplied.

A gauge sign (#) against the price of an item indicates that the product is not preconstituted and that a special professional fee of 64¢ is included in the dispensed price.

Where a STATE is indicated after a manufacturer's code, that brand may be available only in the State indicated.

SECTION 4 - SCHEDULE OF BENEFITS

DRUG TARIFF

Where liquids are purchased by weight, the recovery price includes the "Specific Gravity Factor".

A compounding fee (64¢) is included in the recovery price for all items compounded from ingredients.

Drugs marked (a) and (b) :-

- (a) Where the quantity dispensed is greater than the quantity shown against items marked thus, the recovery price is :-

$$\frac{\text{Quantity dispensed}}{\text{Quantity listed}} \times \text{price shown}$$

- (b) Items marked thus are packed sterile or are unstable.
The recovery price is :-

$$\frac{\text{Quantity dispensed}}{\text{Quantity listed}} \text{ taken to next whole number} \times \text{price shown.}$$

CUMULATIVE AMENDMENTS TO THE PHARMACEUTICAL BENEFITS BOOK
AUGUST 1972 EDITION FOR APPROVED CHEMISTS
AUGUST, SEPTEMBER, OCTOBER, NOVEMBER

SPECIAL PURPOSE AND DANGEROUS DRUG FEES

Recently it was agreed that a special purpose fee and, where applicable a dangerous drug fee, would be included in the dispensed prices for ready prepared pharmaceutical benefits.

The new fees will be :-

Special Purpose Fee	-	3 cents
Dangerous Drug Fee	-	50 cents

The special purpose fee is retrospective to 1 May 1972 and the dangerous drug fee is payable from 1 July 1972.

Both of these fees will be paid automatically for prescriptions dispensed from 1 July 1972. The retrospective adjustments of the special purpose fee will be made as soon as possible.

Please note that the special purpose fee and dangerous drug fee will not be shown in the dispensed prices for this or future amendments to the August 1972 issue of the Schedule.

The publication of the Schedule of Benefits for 1 December 1972 will show prices including these new fees.

AUGUST 1972

PHARMACEUTICAL BENEFITS

Explanatory Circular regarding the August 1972 issue of the Schedule of Benefits for Medical Practitioners

This reprint of the Schedule will take effect from 1 August 1972.

Attention is drawn to the regrouping of aspirin.

Existing items and new items are now listed in the Schedule under the three approved name headings of Aspirin, Aspirin (Buffered) and Aspirin (Soluble).

A summary of other alterations is set out below.

ADDITIONS

NEW ITEMS

Section 2—General Benefits

Amiloride, 5mg tablet (*Midamor*)

Aspirin (Buffered), 325mg tablet (*Bufferin*)

Glucose and Ketone Indicator, 50 reagent strips (*Keto-Diastix*)

NEW FORMS AND STRENGTHS OF EXISTING ITEMS

Section 2—General Benefits

Aminophylline with Ephedrine Hydrochloride and Amylobarbitone, 130mg—25mg—25mg tablet (*Phyline*)

Aspirin (Soluble), 500mg tablet (*Provoprin 500*)

Glucose Indicator, 100 reagent strips (*Diastix*)

Phenethicillin, 250mg per 5ml suspension (*Optipen Forte*)

Section 2—Restricted Benefits

Cephalexin, 500mg tablet (*Keflex*)

Epicillin, 125mg capsule (*Dexacillin*)

Kanamycin, 30mg in 1ml injection (*Kanasig*)

Medroxyprogesterone, 150mg in 1ml injection (*Depo-Provera*)

Trimethoprim with Sulphamethoxazole, 40mg—200mg per 5ml suspension (*Bactrim*, *Septtrin*)

TRANSFERS

Restricted to Unrestricted

Dienoestrol, 0.01% cream

Hospital Only to Section 2—Restricted Benefits

Epicillin, 250mg and 500mg capsules (*Dexacillin*); 125mg per 5ml and 250mg per 5ml powders for syrup (*Dexacillin*)

DELETIONS

Section 2

Acetarsol, 250mg tablet only (*Stovarsol*)
Aldosterone, 500mcg injection (*Aldocorten*)
Bephenium Hydroxynaphthoate, 5G sachet (*Alcopar*)
Castor Oil, 5oz and 100ml
Chlorcyclizine, 50mg capsule only (*Perazil*)
Chlorpromazine, 50mg in 5ml injection only (*Largactil*)
Cocaine, 2% oily eye drops
Dichlorophen, 500mg tablet (*Anthiphen*)
Ethionamide, 125mg sugar coated tablet (*Trescatyl*)
Ichthammol, 5% pessary
Insulin, 80 Units per ml, 5ml injection only
Morphine Sulphate with Hyoscine Hydrobromide, 15mg—600mcg in 1ml injection
Oestradiol Dipropionate, 5mg in 1ml injection (*Ovocyclin*)
Phenylephrine, 1%, 1ml injection only (*Neo-Synephrine*)
Prednisolone Pivalate, 0.5% eye ointment (*Ultracortenol*)
Prednisolone Sodium Phosphate with Neomycin, 5mg—3.5mg (base) per ml, 5ml ear drops (*Predsol-N*)
Progesterone, 25mg I.M. injection (*Proluton*, *DF brand*)
Reserpine, 0.5mg tablet only (*Resedrex*, *Ryser*, *Serpasil*)
Senna Fruit, 50G
Tetracosactrin, 2mg in 2ml injection only (*Cortrosyn Depot*, *Synacthen Depot*)
Thiambutosine, 20% oily suspension injection only (*Ciba 1906 Depot*)
Trimethoprim with Sulphamethoxazole, 20mg—100mg tablet only (*Bactrim*, *Puromyn*, *Septin*)
Triprolidine, 2.5mg capsule only (*Actidil*)

Intravenous Fluids

SECTION 1—EXPLANATORY NOTES

PRESCRIBING OF BENEFITS—PROCEDURE BY DOCTORS

1. All pharmaceutical benefits are listed in this book.
2. Ready prepared items are listed in Sections 2 and 3 of the Schedule of Benefits.
3. The benefit items and additives which may be used in extemporaneous preparations are listed in Section 4 (Green Pages). Where a restriction applies to the use of a drug listed in this Section it is indicated against the item.
4. The following admixtures are not pharmaceutical benefits:
 - (a) the admixture of two or more ready prepared items listed in the Schedule of Benefits; or
 - (b) the admixture of a ready prepared item and a drug or drugs listed in Section 4 of the Schedule of Benefits.
5. The Schedule of ready prepared items includes the form, manner of administration and brand in which these items may be prescribed. Where the words 'solvent required' are included after the form, the item and a solvent may be prescribed as one benefit. In such cases, any determined brand of solvent may be ordered with the item. For clarity, such benefits should be written as one prescription, e.g., 'Penicillin Benzyl, Injection 300 mg amp with 2 ml water for injections'.
6. The Schedule also shows the maximum quantity and the number of repeats allowable for each item. Further details may be found in these notes—paragraphs 15-20.
7. A proprietary name index of ready prepared items is included after Section 5.
8. Symbols used in the Schedule of Benefits:
See page 1, section 2 (white pages).

Prescriptions

9. A prescription ordering a pharmaceutical benefit may be written only for the medical treatment of the person named on the prescription and requiring treatment with that drug. A prescription must not be written for any other purpose and is valid only when it is written by a registered medical practitioner.

10. CARE MUST BE TAKEN TO COMPLY WITH THE PROVISIONS OF STATE LAW, PARTICULARLY IN REGARD TO THE PRESCRIBING OF DRUGS LISTED AS NARCOTIC, SPECIFIED OR RESTRICTED UNDER STATE LEGISLATION.

11. Medical practitioners are required by National Health Act legislation to observe the following rules when writing prescriptions for pharmaceutical benefits:

- (a) Write the prescription in indelible form, i.e., ink or ball point pen in own handwriting (or with the approval of the Director-General otherwise record the prescription) either on the standard prescription form obtained from the printer nominated by the Department or on paper as near as convenient to 7" X 5". The name and address of the medical practitioner should be shown.
- (b) Write the prescription in duplicate marking the duplicate copy with the word 'Duplicate'. This is pre-printed on the standard prescription forms.
- (c) Set out the name and address of the patient, and where the patient holds an S.H.B. (Subsidised Health Benefits) entitlement card write the number in the space provided or at the end of the second line provided for the patient's address. Where the patient is a pensioner who holds an entitlement card write the pension number. EXCEPT WHERE THE PROVISIONS OF STATE LAW REGARDING NARCOTIC, SPECIFIED OR RESTRICTED DRUGS REQUIRE THE ADDRESS TO BE WRITTEN, it is not necessary to write the pensioner's or S.H.B. patient's address on the prescription form.
- (d) In the case of pharmaceutical benefits which are restricted in use, the prescription should be endorsed with the words 'Specified Purpose'. Abbreviations such as 'Spec. Purp.' or 'S.P.' will be accepted. However where a prescription is written for a pensioner for a drug which is restricted to pensioners for any disease or purpose it is not necessary to endorse the prescription 'Specified Purpose'.
- (e) If the benefit is a single drug, the manner of administration must be indicated.
- (f) Where a medical practitioner writes a prescription for a pharmaceutical benefit, but does not specify a particular formula or brand for the item prescribed, the chemist, when dispensing, shall give priority to either the formula, if any, for that item which is specified in the Prescribers' List (Section 5) or to one of the ready prepared brands, if any, for that item included in Section 2.
- (g) When directing that the maximum quantity and repeats of a pharmaceutical benefit be supplied at the one time the prescription must be endorsed in own handwriting with the words 'Regulation 24'. Further details are available in paragraph 20.
- (h) Mark the prescription form 'N.H.S.', date and sign it.

A doctor may write up to three prescriptions on a single sheet of paper, provided each prescription is legible.

The Prescribers' List formulations are expressed in metric terms and made up to metric doses or quantities. Prescriptions consisting of or containing a Prescribers' List formula should be written in the metric system.

Prescriptions for pharmaceutical benefits for more than one person must not be written on the one sheet of paper.

12. A prescription is not valid if the form—

- (a) prescribes a pharmaceutical benefit for a person in respect of whom another prescription for the same benefit has been written on the same day by the same medical practitioner.
- (b) prescribes on the one form a benefit that is a drug of addiction and another benefit and directs that the supply of either benefit is to be repeated. If no repeats of either item are ordered, the prescription may be accepted.
- (c) prescribes a narcotic drug for the medical practitioner writing the prescription.

To avoid confusing patients and the dispensing chemist, doctors should avoid writing prescriptions for pharmaceutical benefits and non-pharmaceutical benefits on the one form. Where the prescription is for a 'Specified Purpose' drug and the patient is not suffering from one of the allowable conditions the doctor should write the prescription on a private prescription form, or if he does use an N.H.S. standard prescription form, delete the N.H.S. printed endorsement.

Manner of Administration

13. Where a particular manner of administration is indicated in the Schedule, the item may not be prescribed as a pharmaceutical benefit for administration in any other way.

Restrictions

14. Certain pharmaceutical benefits may only be prescribed for a particular class of person, for a specified purpose, disease or condition, or with the written authority of the Commonwealth Director of Health. Full particulars of these items and their restrictions are printed in red in Section 2 (White Pages) of the Schedule. Items restricted for use in 'Approved Hospitals Only' are listed in Section 3 (Pink Pages) of the Schedule. These items are not available in all approved hospitals, and medical practitioners should ensure that the items are available at the particular hospital before prescribing.

Pharmaceutical benefits which are restricted to use for Colostomy and Ileostomy conditions are also listed in Section 3 of the Schedule.

Maximum Quantities and Repeats

15. The allowable maximum quantity and number of repeats are shown in columns 2 and 3 of Sections 2 and 3. For other preparations, details are set out in the Table of Maximum Quantities and Repeats—Green Pages.

The maximum quantity of items marked with a double dagger (≠) has been determined as a single pack. Unbroken packs are to be supplied (see paragraph 8).

It would be appreciated if these items were prescribed in original pack sizes.

For other items, the quantity prescribed by a medical practitioner should be that which he believes is necessary for the proper treatment of his patient, provided that the maximum quantity is not exceeded.

If a medical practitioner requires a prescription to be repeated, he must show the quantity to be supplied and the number of repeats. It is not necessary for the maximum quantity to be ordered before the supply can be repeated. Repeats may be for any quantity up to the maximum, irrespective of whether the original supply is for an equal, greater or lesser quantity.

16. The relevant maximum quantity and number of repeats are not to be exceeded, unless the prescription is accompanied by a written authority (see paragraphs 17-18). A benefit shall not be supplied more than the number of times specified in the prescription.

17. Where a person is suffering from a chronic complaint a medical practitioner may, with the written authority of the Commonwealth Director of Health, direct the supply of more than the maximum quantity which would otherwise be allowed.

18. When it is desirable that the patient be not obliged to re-visit his doctor in order to secure repeat supplies, the doctor may, with the written authority of the Commonwealth Director of Health, direct that the supply of a pharmaceutical benefit be repeated more times than the number of repeats specified in the Schedule.

19.—(a) The written authority of the Commonwealth Director of Health to prescribe:

- (i) restricted drugs (paragraph 14); or
- (ii) increased maximum quantities (paragraph 17); or
- (iii) increased number of repeats (paragraph 18), will be forwarded to the doctor on an Authority to Prescribe (Form PB15).

(b) On receipt, the prescription is to be written by the doctor in the space provided for this purpose. The original and duplicate are to be handed to the patient and the yellow copy is retained by the doctor.

20. Generally, a pharmaceutical benefit may not be supplied to the same person more than once on any one day. However, a doctor may direct that the original supply and repeat supplies of a benefit be supplied at the one time, provided he is satisfied that—

- (a) the maximum quantity specified for the benefit is insufficient for the medical treatment of the person for whom it is prescribed;

- (b) that person is suffering from a chronic illness or is resident in a place remote from the nearest approved pharmaceutical chemist; and
- (c) that person, without great hardship, could not obtain the pharmaceutical benefit on separate occasions.

The doctor must endorse the prescription 'Regulation 24', as certification that the above conditions have been satisfied.

Where a prescription is endorsed 'Regulation 24' the chemist will make the appropriate charge (except to pensioners) for the original and the same charge for each repeat that would normally be needed to make up the total supplies. For example, if the prescription ordered two repeats a charge of \$3 would be made to a general patient and \$1.50 to a patient with S.H.B. entitlement.

Urgent Cases

21. In urgent cases, a chemist can supply a benefit before the prescription is surrendered to him, if the doctor communicates the prescription to the chemist by telephone or other means. *In such cases the doctor must write out the prescription and forward it to the approved chemist who made the supply within 24 hours of such communication.* This provision does not apply to prescriptions for supply by chemists where the law of the State in which the chemist's premises are situated requires the prescription to be in writing.

22. The provision for communication of prescriptions in urgent cases applies also to those drugs for which the written authority of the Commonwealth Director of Health is necessary for supply as a pharmaceutical benefit (see paragraph 14). In such cases the doctor must first obtain advice from the Commonwealth Director of Health in the particular State, by telephone or other means, that the authority will be issued, and notify the chemist accordingly when communicating the prescription. *The doctor must subsequently obtain the written authority and forward it, within 24 hours of its receipt, to the approved chemist who supplied the benefit.*

Emergency Drug (Doctor's Bag) Supplies

23. Doctors are entitled to obtain certain pharmaceutical benefits for emergency use. These emergency supplies are not available to ships' doctors. The patient is not required to make any payment when benefits are made available to him from these supplies.

24. Supplies of these drugs may be obtained from an approved chemist upon the production of an official Emergency Drug (Doctor's Bag) order form (except form PB7a) in duplicate, signed by the doctor personally. Each order form is valid only during the month printed thereon and each doctor may obtain the benefits not more often than once per month. Doctors approved to supply pharmaceutical benefits under Section 92 of the National Health Act must not present Doctor's Bag order form PB7a to an approved chemist for their supplies. Special instructions are issued to these doctors.

25. The maximum number of units of each listed form of Emergency Drug may be obtained at the one time, but only if the quantity of the drug that the doctor has on hand is less than that maximum quantity.

26. A doctor may also specify on the order form a particular brand of a benefit. If it is not available, the doctor should be requested to specify in the order a permitted brand which is available, and to initial the alteration. A receipt for the benefits supplied under this provision must be given on the order form. The receipt may be signed by the doctor himself or by any person authorised by him.

Poison Case Reporting

27. In order to provide information for the National Poisons Register doctors are asked to send brief clinical reports on cases of poisoning to the National Poisons Service, Commonwealth Department of Health, Canberra. Report forms are included at the back of this book and should be torn out when required. Additional information may be written on the back of the form, or attached, and this applies particularly in fatal or unusual cases. Further supplies of the Poisoning Case Report forms are available from Commonwealth and State Health authorities.

28. In order to include all cases of poisoning and avoid duplication of reporting, the Poisoning Case Report form should be completed by hospital medical staff for all cases referred to hospital. Private practitioners are only asked to make reports on cases not referred to hospital, or when cases are referred to smaller hospitals without resident medical staff.

SCHEDULE OF BENEFITS

Operative from 1 August 1972

SECTION 2

SYMBOLS USED IN THE SCHEDULE

- (a) An asterisk (*) in front of a restriction indicates an additional or amended purpose in this issue.
- (b) A dagger (†) in front of the form of an item and in the price column indicates a packed line which will be supplied under the original label when prescribed unless the prescription bears specific instructions for use.
- (c) A double dagger (‡) in the maximum quantity column indicates an item for which the maximum quantity has been specially determined to correspond to the manufacturer's pack and the manufacturer's original pack will be supplied.
- (d) A gauge sign (#) against the price of an item indicates that the product is not preconstituted.
- (e) Where a STATE is indicated after the manufacturer's code, that brand may be available only in the State indicated.
N.S.W. - (N); Vic. - (V); Qld. - (Q); S.A. - (S);
W.A. - (W); Tas. - (T).

Attention is drawn to paragraph 11(d) of the explanatory notes which provides for the endorsement of prescriptions for pharmaceutical benefits with the words "specified purpose". Abbreviations such as "Spec. Purp." or "S.P." will be accepted. Where a prescription is written for a pensioner for a drug which, although restricted, is not restricted as to a disease for a pensioner, the pension number is sufficient identification and it is not necessary to endorse the prescription "specified purpose".

The maximum quantity and/or number of repeats in respect of any item shown in the Schedule may be varied by the Commonwealth Director of Health when issuing an authority to prescribe (Form PB15). The quantity and number of repeats shown on the authority shall be supplied. (See paragraphs 17 and 18 of Section 1 - Explanatory Notes (Lemon pages)).

FERROUS GLUCONATE

Ferrous Gluconate								200	mg
Dextrose Monohydrate								500	mg
Orange Syrup, APF								1	ml
Citric Acid								25	mg
Concentrated Chloroform	Water							0.1	ml
Purified Water to								5	ml

FERROUS SULPHATE

Ferrous Sulphate								100	mg
Ascorbic Acid								5	mg
Orange Syrup, APF								1	ml
Concentrated Chloroform	Water							0.1	ml
Purified Water to								5	ml

IPECACUANHA and SQUILL

Ipecacuanha Tincture								0.1	ml
Camphorated Opium Tincture								0.3	ml
Oxymel of Squill								1	ml
Purified Water to								5	ml

MAGNESIUM SULPHATE

Magnesium Sulphate								2	G
Raspberry Syrup								2.5	ml
Concentrated Chloroform	Water							0.04	ml
Purified Water to								5	ml

POTASSIUM CITRATE

Potassium Citrate								1	G
Citric Acid								200	mg
Lemon Syrup, APF								1	ml
Concentrated Chloroform	Water							0.1	ml
Purified Water to								5	ml

POTASSIUM IODIDE

Potassium Iodide								100	mg
Liquorice Liquid Extract								0.25	ml
Aromatic Ammonia Spirit								0.1	ml
Concentrated Chloroform	Water							0.1	ml
Purified Water to								5	ml

PRESCRIPTION

MIXTURES—cont.

POTASSIUM IODIDE and EPHEDRINE

Potassium Iodide									100	mg
Ephedrine Hydrochloride									10	mg
Stramonium Tincture									0.2	ml
Aromatic Ammonia Spirit									0.1	ml
Liquorice Liquid Extract									0.2	ml
Concentrated Chloroform Water									0.1	ml
Purified Water to									5	ml

SODIUM CITRATE

Sodium Citrate									1	G
Citric Acid									200	mg
Lemon Syrup, APF									1	ml
Concentrated Chloroform Water									0.1	ml
