INTRODUCTION

These notes are designed for the use of approved chemists. They describe the procedures by doctors and dentists in prescribing benefits and the procedures by approved chemists in supplying benefits. They go on to outline the action on the part of approved chemists in coding prescriptions for processing by computer and the submission by them of claims for payment. Finally the notes explain the pricing arrangements in accordance with which approved chemists' claims are processed for payment.

THE SCHEDULE OF BENEFITS

1. Pharmaceutical benefits which may be prescribed by doctors are listed in this book. The schedule also includes a list of pharmaceutical benefits which may be prescribed by participating dental practitioners for dental treatment only. These items are listed in Section 2 after the Intravenous Fluids for Injection.

2. Ready prepared items are listed in sections 2 and 3 of the Schedule and each form and strength is identified by a unique five-character code. (See also paragraph 107). Restrictions apply to the prescribing of certain items in section 2 and all of the items in section 3. Further details may be found in these notes—paragraphs 16 (d) and 20.

3. The Schedule of ready prepared items includes the form, manner of administration and brand of these items which may be prescribed. Where the words 'solvent required' are included after the form, the item and a solvent may be prescribed as one benefit. In such cases, any determined brand of solvent may be ordered with the item. For clarity, such benefits should be written as one prescription, e.g., 'Benzylpenicillin, Injection 300 mg amp with 2 ml water for injections'.

4. The Schedule also shows the maximum quantity and the number of repeats allowable for each item. Further details may be found in these notes—paragraphs 21-29.

5. The drugs which may be used in extemporaneous preparations are listed in section 4 (Green pages). Where a restriction applies to the use of a drug listed in this section it is indicated against the item. Prices of these drugs are published in a separate booklet—Extemporaneously Prepared Benefits—which includes the following:

- (i) table of codes, maximum quantities and number of repeats for extemporaneous preparations;
- (ii) container prices; and
- (iii) a list of Standard Formulae preparations and prices (see paragraph 98).

6. The following admixtures are not pharmaceutical benefits:

- (a) the admixture of two or more ready prepared items listed in the Schedule of Benefits; or
- (b) the admixture of a ready prepared item and a drug or drugs listed in section 4 of the Schedule of Benefits.

7. Formulae in common use are listed in section 5—Prescribers' List (Green Pages).

8. Container prices, fees, standard packs and prices for ready prepared preparations are listed in section 6 (Blue Pages)

9. A proprietary name index of ready prepared items is published in a separate booklet.

10. Also published in the booklet is a code index of ready prepared and extemporaneously prepared pharmaceutical benefits.

11. Symbols used in the Schedule of Benefits are explained on page 1, section 2 (White Pages).

12. Price changes and other amendments are advised each month so that the information in the Schedule may be updated regularly.

13. To facilitate coding, a separate list of the more frequently used N.H.S. items and relevant codes for ready reference is provided with each reprint of the Schedule.

CONDITIONS UNDER WHICH BENEFITS MAY BE PRESCRIBED AND DISPENSED

14. CARE MUST BE TAKEN TO COMPLY WITH THE PROVISIONS OF STATE LAW, PARTICULARLY IN REGARD TO DRUGS LISTED AS NARCOTIC, SPECIFIED OR RESTRICTED UNDER STATE LEGISLATION.

A. PRESCRIBING OF BENEFITS— PROCEDURE BY DOCTORS AND DENTISTS

Prescriptions

15. A prescription ordering a pharmaceutical benefit may be written only for the medical or dental treatment of the person named on the prescription and requiring treatment with that pharmaceutical benefit. A prescription must not be written for any other purpose and is valid only when it is written by a registered medical practitioner or a participating dental practitioner.

16. Medical practitioners and dental practitioners are required by legislation under the National Health Act to observe the following rules when writing prescriptions for pharmaceutical benefits:

- (a) Write the prescription in indelible form, i.e., ink or ball point pen in own handwriting (or with the approval of the Director-General otherwise record the prescription) either on the standard prescription form supplied by the Department or on paper as near as convenient to 18 cm x 12 cm. The standard prescription forms supplied by the Department to participating dentists have a blue margin to distinguish them from the forms supplied to medical practitioners. The name and address of the medical practitioner or dental practitioner must be shown and 'N.H.S.' endorsed at the top. Each dentist is also required to endorse each prescription with the D.P. number in the appropriate space. Doctors who have obtained approval to record prescriptions in other than their own handwriting will endorse the prescriptions 'Regulation 19 (1) (a) approval obtained'

(b) Write the prescription in duplicate marking the duplicate copy with the word 'Duplicate'. This is pre-printed on the standard prescription forms.

(c) Set out the name and address of the patient, and where the patient is a pensioner who holds a Pensioner Health Benefits Card write the pension number. EXCEPT WHERE THE PROVISIONS OF STATE LAW REGARDING NARCOTIC, SPECIFIED OR RESTRICTED DRUGS REQUIRE THE ADDRESS TO BE WRITTEN, it is not necessary to write the pensioner's address on the prescription form.

(d) In the case of pharmaceutical benefits which are restricted in use, the prescription must be endorsed in the doctor's own handwriting with the words 'Specified Purpose'. Abbreviations such as 'Spec. Purp.' or 'S.P.' will be accepted. However, where a prescription is written for a pensioner for a drug which is restricted to pensioners it is not necessary to endorse the prescription 'Specified Purpose'.

(e) Where the words 'solvent required', are included after the form of a benefit, the doctor or dentist must specify the volume and number of ampoules of solvent to be supplied (see paragraph 131).

(f) The pharmaceutical benefit must be identified in the prescription by such particulars as are necessary for the complete identification of that benefit.

(g) If the benefit is a single drug, the manner of administration must be indicated.

(h) When directing that the maximum quantity and repeats of a pharmaceutical benefit be supplied at the one time, the prescription must be endorsed in the doctor's own handwriting with the words 'Regulation 24'. Further details are available in paragraphs 29 and 55.

(i) Date and sign the prescription.

17. Prescriptions for pharmaceutical benefits for more than one person may not be written on the one prescription form.

18. A prescription is not a valid pharmaceutical benefit prescription if—

(a) the medical practitioner prescribes a pharmaceutical benefit for a person in respect of whom another prescription for the same benefit has been written on the same day by the same medical practitioner;

(b) the medical practitioner prescribes on the one form a benefit that is a drug of addiction and another benefit and directs that the supply of either benefit is to be repeated. If no repeats of either item are ordered, the prescription may be accepted;

(c) the medical practitioner prescribes a narcotic drug for the medical practitioner writing the prescription.

(d) the dental practitioner prescribes a pharmaceutical benefit for a person in respect of whom another prescription for the same benefit has been written on the same day by the same dental practitioner.

Manner of Administration

19. Where a particular manner of administration is indicated in the Schedule of Benefits, the item may not be supplied as a pharmaceutical benefit for administration in any other way, e.g. an ophthalmic preparation prescribed for topical use.

Restrictions

20. Certain pharmaceutical benefits may only be prescribed for a particular class of person, for a specified purpose, disease or condition, or with the written authority of the Commonwealth Director of Health in the State concerned. Particulars of these drugs and the relevant restriction endorsements which are required on prescriptions are printed in red in the Schedule. It is not necessary for the particular restriction to be identified on the prescription. Items available for use for Colostomy and Ileostomy conditions as well as items available for use by Paraplegic and Quadriplegic patients are listed in section 3 of the Schedule.

Maximum Quantities and Repeats

21. For ready prepared preparations, the allowable maximum quantity and number of repeats are shown in the third and fourth columns of sections 2 and 3. For other preparations, details are set out in the Table of Maximum Quantities and Repeats (Green Pages).

22. The maximum quantity of an item marked with a double dagger (‡) has been determined as a single pack. As explained on page 1, section 2 (White Pages), irrespective of the quantity prescribed, the standard pack must be supplied.

23. For other items, it is not necessary to prescribe the maximum quantity if the medical or dental practitioner considers a lesser quantity is sufficient for the patient's needs.

24. If a medical practitioner requires a prescription to be repeated he must show the quantity to be supplied and the number of repeats. It is not necessary for the maximum quantity to be ordered before the supply can be repeated. Repeats may be for any quantity up to the maximum, irrespective of whether the original supply is for an equal, greater or lesser quantity.

25. The relevant maximum quantity and number of repeats are not to be exceeded, unless the prescription is accompanied by a written authority (see paragraphs 26, 27).

Authority to Prescribe

26. Where a person is suffering from a chronic complaint a medical practitioner may, with the written authority of the Commonwealth Director of Health,

direct the supply of a quantity of a pharmaceutical benefit greater than the maximum quantity which would otherwise be allowed.

27. In circumstances where it is desirable that the patient be not obliged to re-visit his doctor in order to secure repeat supplies, the doctor may, with the written authority of the Commonwealth Director of Health, direct that the supply of a pharmaceutical benefit be repeated more times than the number of repeats specified in the Schedule.

28.—

(a) The written authority of the Director of Health to prescribe:

(i) restricted drugs (paragraph 20); or

(ii) increased maximum quantities (paragraph 26); and/or

(iii) increased number of repeats (paragraph 27),

will be forwarded to the doctor on an Authority to Prescribe (Form PB15) or to the doctor or the patient on an Authority Prescription (Form PB86).

(b) When the authority is given on form PB15 the doctor will write the prescription in the space provided on the form for this purpose.

Regulation 24

29. Generally, a pharmaceutical benefit may not be supplied to the same person more than once on any one day. However, a doctor may direct that the original supply and repeat supplies of a benefit ordered in a prescription be supplied at the one time, provided he is satisfied that—

(a) the maximum quantity specified for the benefit prescribed is insufficient for the medical treatment of the person for whom the prescription is written;

(b) that person is suffering from a chronic illness or is resident in a place remote from the nearest approved chemist or approved medical practitioner; and

(c) that person, without great hardship, could not obtain the pharmaceutical benefit on separate occasions.

The doctor must endorse the prescription 'Regulation 24', as certification that the above conditions have been satisfied.

Urgent Cases

30. In cases of urgency, a doctor or dentist may communicate a prescription to an approved chemist by telephone or other means. In such cases the doctor or dentist must reduce the prescription to writing and forward it within 24 hours of such communication to the approved chemist who made the supply. For further details see paragraph 61.

31. The provision for communication of prescriptions in urgent cases applies also to those drugs for which the written authority of the Commonwealth Director of Health is necessary for supply as a pharmaceutical benefit (see paragraph 20). In such cases, the doctor must first obtain advice from the

Director in the particular State, by telephone or other means, that the authority will be issued and notify the approved chemist accordingly when communicating the prescriptions. The doctor must subsequently obtain the written authority, write the prescription in the space provided and forward the completed form within 24 hours of its receipt to the approved chemist who supplied the benefit.

Emergency Drug (Doctor's Bag) Supplies

32. Certain pharmaceutical benefits are provided free to doctors for emergency use. These emergency supplies are not available to ships' doctors. The patient is not required to make any payment when benefits are made available to him from these supplies.

33. Supplies of these drugs may be obtained from an approved chemist upon the production of an official Emergency Drug (Doctor's Bag) Order Form (Form PB7) in duplicate, signed by the doctor personally. Doctors approved to supply pharmaceutical benefits under section 92 of the National Health Act are to use Form PB7A which must not be presented to an approved chemist for their supplies. Special instructions are issued to these doctors.

B. SUPPLY OF BENEFITS—PROCEDURE BY APPROVED CHEMISTS

34. An approved chemist is authorised to supply a pharmaceutical benefit only upon the surrender of—

(a) a valid prescription, dated within six months before the date of its presentation; or

(b) a benefit ordered on an Authority Prescription (Form PB86) or an Authority to Prescribe (Form PB15) which has been dated by the prescribing medical practitioner within six months before the date of its presentation; or

(c) a repeat authorisation presented with a duplicate prescription within six months of the date of the prescription.

35. A pharmaceutical benefit may not be supplied to the same person more than once on any one day, except where a prescription is endorsed 'Regulation 24' (see paragraph 55).

36. The National Health Act requires that a prescription must be written by a registered medical practitioner or a participating dental practitioner. In the event that the chemist cannot recognise the doctor's or dentist's signature he should take all reasonable steps to satisfy himself that the prescription was written by a registered medical practitioner or a participating dental practitioner.

37. Prescriptions for items deleted from the Schedule of Benefits may not be dispensed as benefits as from the date of effect of deletion.

38. Where restrictions are removed or applied with regard to the prescribing of a benefit, valid prescriptions written before the date of effect of the restriction changes may still be dispensed as benefits.

39. Where the maximum quantity and/or number of repeats of an item are altered, the quantities and repeats which have been prescribed on valid prescriptions written before the date of effect of the alterations may be dispensed.

40. Before a benefit is supplied on presentation of a prescription the approved chemist is required to:—

- (i) mark his name and approval number on the prescription form and duplicate;
- (ii) allot a number which will identify the prescription and write that number on the form and duplicate; and
- (iii) if more than one prescription has been written on the one form allot a separate number to each prescription.

41. Prescription forms on which are prescribed both pharmaceutical benefit items and non-pharmaceutical benefit items may be accepted. The non-benefit items will be supplied as private prescriptions and cancelled from the form.

42. A benefit shall not be supplied a number of times greater than the number specified in the prescription.

Deferred Supply

43. When a patient presents a prescription form, in duplicate, ordering more than one benefit item, and does not require the supply of one or more of the benefit items at the same time as other benefit items prescribed on the form, a separate repeat authorisation for each deferred item must be prepared in duplicate and the words 'Original Supply Deferred' must be stamped across the relevant item on the original and duplicate of the prescription form. The duplicate must be stamped in such a manner as to not render the duplicate illegible. DEFERRED ITEMS MUST NOT BE CODED ON THE ORIGINAL PRESCRIPTION FORM.

44. The repeat authorisation, Form PB 13, when it is used for a deferred supply of an original prescription item, is to be prepared and issued in the same manner as is required for the normal authorisation of repeats except that—

- (i) '0' is to be inserted in the space for 'No. of times already dispensed'
- (ii) if no repeats are ordered, '0' is to be inserted in the space for 'No. of Repeats Authorised'

45. The supply of a benefit on a repeat authorisation form which has been prepared for deferred supply is to be regarded as the first occasion of supply. If repeats have been directed the normal procedure in regard to repeat authorisations will apply at the time of first supply. (see paragraph 120 regarding the coding of the repeat authorisation form which has been prepared for deferred supply, when the deferred supply has been made.)

Repeat Authorisations

46. Where repeats are allowable a benefit may be supplied on a repeat authorisation only when it is presented with a duplicate prescription to which it is duly related and it is indicated that the pharmaceutical benefit to be supplied has not already been supplied the number of times directed in the prescription.

47. Repeat prescriptions for items deleted from the Schedule of Benefits may not be dispensed as benefits as from the date of effect of deletion.

48. However, where changes to restrictions, maximum quantities and/or number of repeats occur (as for original prescriptions, paragraphs 38, 39), repeat authorisations which relate to valid prescriptions written before the date of effect of the alterations, may be dispensed as benefits.

49. When a benefit is supplied on presentation of a repeat authorisation, the approved chemist shall mark his name and approval number in the space provided on the repeat authorisation.

50. Before a benefit is supplied on presentation of a prescription which contains a direction to repeat the supply (when repeats are allowable) or on a repeat authorisation requiring further allowable repeats the approved chemist shall prepare a repeat authorisation form in duplicate, except when supply under the provisions of Regulation 24 is authorised (see paragraph 55).

The repeat authorisation form shall show:—

- (i) the number of times the benefit has been directed to be repeated and the number of times supply has been made;
- (ii) on the first occasion of supply of the benefit, his approval number, together with the identifying number allotted by him to the prescription and the date of the original prescription;
- (iii) on subsequent occasions of supply the approval number and the prescription identifying number relating to the original supply and the date of the original prescription;
- (iv) if the prescription or repeat authorisation is for a pensioner, the pension number appearing on the prescription;
- (v) in the case of repeats on an Authority Prescription (Form PB86) or an Authority to Prescribe (Form PB15), the authority number should be endorsed on the repeat authorisation (Form PB13) in the space provided.

51. At the time of supply of the benefit the completed repeat authorisation together with duplicate of the prescription is to be issued to the person to whom the benefit is supplied.

52. Separate repeat authorisations are to be prepared in respect of an injectible benefit which requires a solvent, and the solvent when a solvent is prescribed. The procedure to be followed in endorsing prescriptions and repeat forms is covered in 'CODING AND SUBMISSION OF PRESCRIPTIONS—PROCEDURE BY APPROVED CHEMISTS'.

Procedure when an Authority is presented

53. When a benefit is ordered on an Authority Prescription (Form PB86) or an Authority to Prescribe (Form PB15) the doctor will have written the prescription on the original (white) and duplicate copies of the authority form. The approved chemist will—

- (a) enter in the designated places on the Authority form the information listed in paragraphs 114-119 except that the quantity (Q) and the number of repeats (R) should not exceed the quantity and number of repeats authorised.

(b) where a solvent has been prescribed for an injectible a diagonal line should be drawn through the pre-printed coding box on the Form PB86 or Form PB15 and two code stamp imprints placed on the back of the form. One coding box should be used for the injectible item and the other for the solvent.

(c) obtain the signature of the patient or signature and address of the agent and date of supply.

54. Repeats, when ordered and allowable on an Authority Prescription (Form PB86) or an Authority to Prescribe (Form PB15), will be handled in the same manner as repeats for other N.H.S. prescriptions.

Regulation 24

55. Where a prescription is endorsed 'Regulation 24' (see paragraph 29), an approved chemist is authorised to supply the benefit and the repeats of that benefit at the one time. He should not complete a repeat authorisation form. An amount equivalent to one professional fee and where applicable, one dangerous drug fee is payable for the total supply. With regard to patient contribution for 'Regulation 24' supply, see paragraph 65.

Receipts

56. Upon the supply to a person of a benefit by an approved chemist, that person shall sign and date a receipt for that benefit on the prescription form or repeat authorisation, as the case may be. If the person taking delivery of the benefit is not the person for whose treatment the prescription was written, he shall in addition endorse the prescription form or repeat authorisation with his address. Not in any circumstances must a person give or an approved chemist demand a receipt until supply of the benefit has actually been made.

57. Where a benefit is supplied through the post, by rail, or other means of transport, and it is impracticable to obtain a receipt, the approved chemist must certify on the prescription or repeat authorisation, as the case may be, that he has supplied the pharmaceutical benefit, the date on which the supply was made and particulars of the means of supply. Where a benefit is supplied prior to the presentation of a prescription (urgent cases see paragraphs 30, 31 and 61) or to a person who cannot read or write, or who is unable to write, the approved chemist should sign and date a statement on the prescription or repeat authorisation, certifying that he has supplied the benefit and indicating the circumstances of supply.

Emergency Drug (Doctor's Bag) Supplies

58. Certain pharmaceutical benefit items may be supplied to medical practitioners on receipt of an official Emergency Drug (Doctor's Bag) Order Form (Form PB7) in duplicate, signed by the doctor personally. These items are listed at the end of section 1 (Lemon Pages) of the Schedule. Each order form is valid during the month printed thereon and each doctor may obtain the benefits not more often than once per month. If the signature appearing on an Emergency Drug (Doctor's Bag) Order Form is that of a doctor unknown to the approved chemist the latter is required to obtain, from the person presenting

the order, particulars of the full name and address and medical registration number of the doctor, and endorse these particulars on the back of the original copy of the order form.

59. The quantity of emergency drug items which may be supplied at the one time must not exceed those quantities specified in the list shown in section 1 (Lemon Pages).

60. A doctor may also specify on the order form a particular brand of a benefit. If it is not available, the doctor should be requested to specify in the order a permitted brand which is available, and to initial the alteration. On supply of the benefits ordered on the order form, a receipt for the benefits must be signed by either the doctor himself or by a person authorised by him.

Urgent Cases

61. A pharmaceutical benefit may be supplied by an approved chemist before the prescription for that benefit has been surrendered to him, where in cases of urgency, the doctor or dentist communicates the prescription to the approved chemist by telephone or other means. This provision does not apply to prescriptions for supply by approved chemists where the law of the State in which that approved chemist's premises are situated requires the prescription to be in writing. This provision also applies to drugs for which the written authority of the Commonwealth Director of Health is necessary for supply as pharmaceutical benefits.

C. CHARGES TO PATIENTS

Patient Contribution

62. An approved chemist may in respect of each supply by him whether on a prescription or repeat authorisation, charge the person to whom the pharmaceutical benefit is supplied an amount not exceeding \$2.75 in respect of general patients. A charge is not to be made for the supply of a pharmaceutical benefit on a prescription on which the prescribing medical or dental practitioner has written the pension number or a repeat authorisation on which is written the patient's pension number. Where a solvent may be prescribed as part of a benefit, only one prescribed charge may be made for each supply of the benefit.

63. The approval of a chemist is subject to the conditions that—

- (a) he will not, by advertisement, notice or otherwise, state or indicate that he is willing to supply all or any pharmaceutical benefits to all or any persons (except pensioners) without charge or for a charge of less than \$2.75 to general patients for each supply;
- (b) he will clearly indicate in any statement made by advertisement, notice or otherwise, that any offer to supply drugs or medicinal preparations without charge or at a reduced charge does not apply to the supply of pharmaceutical benefits.
- (c) he will not follow a practice of supplying all or any pharmaceutical benefits to all or any persons (except pensioners) without charge or for a charge that is less than \$2.75 in respect of general patients;

- (d) he will not enter into an agreement or arrangement to pay rebates or refunds of the authorised prescription charges nor will he become a party to such agreements.

64. Where a doctor has obtained an authority from the Commonwealth Director of Health to prescribe a quantity greater than the normal maximum quantity (see paragraph 26) the authorised prescribed charges should be made for each supply of the increased maximum quantity.

65. Where a doctor has endorsed a prescription 'Regulation 24' (see paragraphs 29 and 55) the approved chemist should make the relevant prescribed charge for the original and the same charge for each repeat that would normally be needed to make up the total supplies. For example, if the prescription ordered two repeats, a charge of \$8.25 should be made to a general patient.

66. A prescription, other than a prescription for a pensioner, written for a benefit for which the dispensed price at the date of supply is equal to or less than \$2.75 is not a prescription for a pharmaceutical benefit. This also applies to prescriptions endorsed 'Regulation 24' (see paragraphs 29 and 55), for which the price of the total quantity of the benefit supplied is less than the authorised charge specified in paragraph 65.

After Hours

67. A charge not exceeding \$2 may be made when an approved chemist is required to return to his approved premises in order to supply a pharmaceutical benefit or pharmaceutical benefits at a time outside normal trading hours. Only one \$2 charge may be made on the one occasion, irrespective of the number of benefits supplied. The charge is recoverable from the patients concerned and not from the Department.

Delivery

68. A charge equal to the cost of delivering may be made if supply by delivery is made at or to a place other than the approved chemist's pharmacy.

Responsibility

69. It is the patient's responsibility to meet any charge lawfully demanded and an approved chemist may refuse to supply a pharmaceutical benefit if payment of a charge is not made.

70. An approved chemist or a doctor is not entitled to demand or receive a payment (other than a payment from the Department) or other valuable consideration in respect of the supply of a pharmaceutical benefit except as set out herein.

D. MISCELLANEOUS

Premises

71. Approval to supply pharmaceutical benefits is granted to a chemist in respect of particular premises. Benefits may be supplied from these premises only.

Approved Doctors, Friendly Societies

72. Doctors approved to dispense pharmaceutical benefits should follow the procedures explained in these Notes unless otherwise indicated. Friendly Society Pharmacies should follow the procedures subject to additional instructions made available to them.

Standards

73. An approved chemist should not supply as a pharmaceutical benefit a substance that does not conform to the standards of composition or purity prescribed, or that has as an ingredient a substance that does not conform to those standards. The standards which are applicable to pharmaceutical benefits are—

- (a) in the case of British Pharmacopoeia or British Pharmaceutical Codex drugs or medicinal preparations, those standards set out in the Therapeutic Goods Act;
- (b) in the case of drugs or medicinal preparations contained in the Australian Pharmaceutical Formulary, or earlier editions of the British Pharmacopoeia or British Pharmaceutical Codex, those standards specified in the particular edition in relation to the drug or medicinal preparation.

References

74. Monographs in the British Pharmacopoeia and previous editions, the British Pharmaceutical Codex, and the Australian Pharmaceutical Formulary, and items listed in the Prescribers' List are identified in this book by the letters BP, BP 1968, BP 1963, BP 1958, BP 1953, BP 1948, BPC, BPC 1968, BPC 1963, BPC 1959, BPC 1954, BPC 1949, APF, APF 1969, APF 1964, APF 1955, APF 1947, or PL as appropriate.

Hours of Supply

75. A person is entitled to be supplied with pharmaceutical benefits during normal trading hours established by or under the law of the State or Territory when he presents a valid prescription and pays any charge applicable. When the prescription is marked 'urgent' and initialled by the doctor or dentist who wrote the prescription, it is obligatory for the approved chemist to make supply at his pharmacy at any hour.

76. An approved chemist shall, at all times, keep prominently displayed, at each of the premises in respect of which he is approved, a notice setting out his normal trading hours for the supply of pharmaceutical benefits.

Proper Stocks to be Kept

77. An approved chemist shall, as far as practicable keep in stock an adequate supply of all drugs and medicinal preparations that he may reasonably be expected to be called upon to supply as pharmaceutical benefits, or as ingredients of pharmaceutical benefits.

Statement of Stocks

78. An approved chemist may be required to furnish, within a specified time and in accordance with a form supplied to him, a signed statement setting out particulars of stocks of drugs or medicinal preparations that are in his possession or under his control immediately before the date on which the statement is signed. This refers only to drugs and medicinal preparations that are pharmaceutical benefits or are capable of being used as ingredients in pharmaceutical benefits.

Retention of Documents

79. Without affecting the requirements of the law of a State in regard to drugs of addiction or restricted drugs, every approved chemist is required to retain in his possession for not less than one year from the date on which the pharmaceutical benefits were supplied—

- (a) the duplicates of prescriptions which do not bear repeat instructions;
- (b) the duplicates of repeat authorisations;
- (c) in the case of an approved chemist making supply on the last occasion of supply, the duplicates of prescriptions that bear instructions to repeat; and
- (d) the duplicates of order forms presented in connection with Doctor's Bag Supplies.

Suspected Forgery

80. If an approved chemist is not satisfied that the signature on a prescription form is that of a medical practitioner or dental practitioner, or suspects that the prescription has been forged or fraudulently obtained, he is entitled, before supplying the benefit, to obtain a statement from the person obtaining the benefit. However, in the case of Emergency Drug (Doctor's Bag) order forms particular requirements are set out in paragraphs 33 and 58.

Sale Copies

81. Copies of the National Health Act and Regulations are available from the Australian Government Publishing Service in each capital city.

82. Additional copies of this publication may be purchased from the Commonwealth Department of Health in each capital city. Price and order form will be furnished upon inquiry.

Supplies of Stationery

83. Claim Forms, Repeat Authorisations, etc., are available from the Commonwealth Director of Health in each capital city.

Enquiries

84. Enquiries regarding pharmaceutical benefits may be made at the Office of the Commonwealth Director of Health in each capital city.

CODING AND SUBMISSION OF PRESCRIPTIONS PROCEDURE BY APPROVED CHEMISTS

A. INTRODUCTION

85. The pricing of valid prescriptions, repeat authorisations and Doctor's Bag order forms and the calculation of the total amount payable for each claim are carried out by means of an electronic computer which operates on coded information provided by the approved chemist in respect of each pharmaceutical benefit supplied under the National Health Act.

86. The system is designed to enable approved chemists to prepare claims correctly with a minimum of work but it is, however, essential that the instructions be followed carefully and without modification. The inclusion in claims of incorrectly coded or otherwise defective prescriptions can be expected to interrupt processing and delay payments.

87. The interest and co-operation of approved chemists in ensuring that claims are always correctly prepared is invited and would substantially assist this Department to maintain a programme of prompt and satisfactory payments.

B. GENERAL

Time for Lodgment of Claims

88. Claims for pharmaceutical benefits may be lodged at the office of the Commonwealth Department of Health in your capital city at any time during the month and should comprise approximately one month's dispensing. Claims for pharmaceutical benefits supplied more than six months prior to the date of claiming will not be accepted for computer processing, but will require manual pricing of prescriptions and preparation of tally sheets and claim forms by the chemist. Approved chemists desiring to submit such claims should contact the office of the Director of Health for instructions regarding the preparation of the claims and the necessary forms.

Documents to be Submitted

89. A claim for pharmaceutical benefits consists of:

- (i) A completed claim form PB1.
- (ii) Where applicable a completed Form PB42—Isolated Pharmacy Allowance—claim for payment (see paragraphs 150, 151).
- (iii) The originals of all prescriptions, repeat authorisations, as well as special authority prescriptions for benefits supplied to the general public. These should be together in a separate bundle from the pensioner prescriptions.
- (iv) The originals of all prescriptions, repeat authorisations, as well as special authority prescriptions for benefits supplied to pensioners. These should be together in a separate bundle from the general benefit prescriptions.

NOTE:—Generally, prescriptions in each bundle should be submitted in serial number order. The exception to this is where an approved chemist has elected to price extemporaneously prepared prescriptions (see paragraphs 99, 116). These prescription forms should be placed at the back of the relevant bundle irrespective of serial numbers and the fact that other prescriptions may appear on the same form.

- (v) The original orders for Emergency Drug (Doctor's Bag) supplies in a separate bundle.

- (vi) Repeat authorisations for an injectible item and the related solvent must bear consecutive serial numbers and must be stapled together.

Completion of Claim Form

90. Particulars of claimant's name, address of approved premises, approval number and chemist's reference month should be entered in the spaces provided on the claim form PB1. It is important that these particulars agree entirely with the latest written information held by this Department, i.e., application for approval form or later letter. In the event of discrepancies, payment will necessarily be delayed pending clarification.

91. The numbers to be entered on the claim form are the first and last serial numbers given to items on the General and Pensioner Benefits and Emergency Drug (Doctor's Bag) forms respectively (see paragraph 97). The last numbers should be the total numbers of these categories.

92. Please note that no entry of the amount of the claim is required—this will be calculated by computer after the prescriptions have been individually priced.

93. The declaration on the claim form must be signed by the approved person unless an authority for another person to do so has been sent by the approved person to the Commonwealth Director of Health in the State concerned.

Prescription Identifying Numbers

94. In addition to a serial number (see paragraph 97), each pharmaceutical benefit prescription dispensed must be given a number which identifies it specifically. Prescription book numbers are preferable but any other series which will meet the purpose may be used, provided that the chemist's approval number is not a component of such numbers. Please note that these numbers are to be entered in the Coding Stamp imprint (see paragraphs 109, 112).

95. Further, in cases where an approved chemist allots an identifying number to a repeat authorisation as distinct from the original prescription number allotted by the approved chemist issuing the repeat authorisation, he should enter this new identifying number in the appropriate coding box pre-printed on the front of the form.

Pharmacy Stamp

96. Before supply of a benefit, each prescription form, repeat authorisation form and authority to prescribe form should be endorsed with the name of the approved person and his approval number. This information may be stamped, written or typed.

Serial Numbering of Prescriptions, Repeat Authorisations and Emergency Drug (Doctor's Bag) Order Forms

97. Within each claim, prescriptions dispensed should be serially numbered commencing at—

- (a) 1 for general prescriptions;

- (b) P1 for pensioner benefits; and

- (c) D1 for Emergency Drug (Doctor's Bag) supplies.

Each Doctor's Bag item should be given a serial number, e.g., if there are five items on the first form in the claim the first item on the second form in the claim will be D6.

Standard Formulae List of Extemporaneous Preparations

98. Included in the booklet—Extemporaneously Prepared Benefits—is a comprehensive list of pre-priced extemporaneous preparations. The list is comprised of formulae taken from formulary in common use. This list is referred to in these notes as the Standard Formulae List. Each preparation is identified with a unique five-character code.

Special Provisions Governing Payment for Extemporaneous Prescriptions Outside the Standard Formulae List

99. Where an approved chemist elects to price out these prescriptions formal advice is required by the Department. Once made, however, such an election cannot be varied for a period of three months and applies to all extemporaneously dispensed formulae for which there are no five-character codes in the Standard Formulae List.

100. Unless he so elects, the approved chemist will be paid at an average reimbursement rate for these prescriptions. Under this system, payment is made on the basis of an average 10 g/ml rate applied to the category of preparation concerned, i.e., the price will be ascertained by multiplying the appropriate 10 g/ml rate by the number of 10 g/ml units supplied and adding container and professional fees. For example, an 80 ml mixture would be priced at eight times the average 10 ml rate for mixtures, plus container and professional fee. Notwithstanding that an approved chemist is accepting the average price for non-pre-priced prescriptions, he may price out 'exceptional' prescriptions and code for reimbursement at that price (see paragraph 105).

101. The average 10 g/ml rate may vary from month to month but the rate for a particular prescription will be that applicable for the month in which it was supplied. The current month's average 10 g/ml rates are printed on the last page of the Statement of Account (see paragraphs 123-130).

102. By agreement with the Pharmacy Guild of Australia the average 10 g/ml rate is determined as in paragraph 103.

103. Each month the total number of 10 g/ml units of each type of pre-priced extemporaneous preparation claimed for will be ascertained for each State, together with the total values minus container and professional fees. From these figures an average 10 g/ml rate will be calculated for each type of preparation for each State. This rate will be used as the rate for calculating prices for the prescriptions supplied in the

succeeding month. It should be noted that prescriptions ordering a combination of standard preparations also fall outside the scope of the Standard Formulae List and therefore are subject to this section.

104.—

(a) Any variant to a formula included in the Standard Formulae List (addition and deletion of an ingredient or variation of dose up or down) takes the formula dispensed outside the Standard Formulae List and it becomes subject to this section, i.e., it cannot be identified with the code of the formula which it resembles.

(b) Where an approved chemist is accepting the average price of non-pre-priced prescriptions, and where an ingredient is added to a standard formula and the recovery price for the standard formula plus additive under the average price system is less than that for the standard formula alone, the approved chemist may code that prescription as though it were a standard formula item.

105. An exceptional prescription is a prescription for an extemporaneously prepared pharmaceutical benefit which is not included in the Standard Formulae List and for which the price of the ingredients calculated in accordance with basic pricing rules (paragraphs 138-146) is twice or more than twice the recovery price of the ingredients calculated on an average price basis (paragraph 100).

C. PROVISION OF CODED INFORMATION BY AN APPROVED CHEMIST

Entering of Information

106. The approved chemist will enter relevant information on each document he submits in support of his claim. The information to be entered will depend upon the type of document, i.e., original or repeat supply, Emergency Drug (Doctor's Bag) order form, etc., and on the category of prescription, i.e., ready prepared or extemporaneously prepared.

Codes for Preparations which are Pre-priced

107. A unique five-character code (e.g. 1001Q) is shown for:

- (i) each form and strength of every ready prepared benefit (sections 2 and 3, Schedule of Benefits);
- (ii) each standard formula preparation listed in the Standard Formulae List.

Pharmaceutical benefit items which may be prescribed by participating dental practitioners are listed in a group at the end of Section 2 and a separate series of codes has been allocated to them. Only those pharmaceutical benefit items prescribed by dental practitioners should be coded with the appropriate codes published in this section.

Codes for Extemporaneous Preparations which are not Pre-Priced

108. Three-character codes representing each type of extemporaneous preparation, e.g., mixtures, ointments, etc., are shown in the Table of Codes, section 4 (Green Pages) of the Schedule. These three-character codes are to be used by the approved chemist in coding those prescriptions where a doctor has either specified the individual ingredients of a preparation or ordered a combination of standard formulae or has varied in any way a preparation included in the Standard Formulae List, and the approved chemist has not elected to price out his prescriptions. Where the approved chemist has elected to price out such prescriptions then action as outlined in paragraph 116 should be taken.

Coding Stamp

109. One stamp is provided for coding both Ready Prepared Benefits and Extemporaneously Dispensed Benefits. This stamp provides spaces for coded information on original prescription forms. Repeat authorisation forms, Emergency Drug (Doctor's Bag) Order forms and Authority to Prescribe forms currently on issue have printed coding spaces.

110. Stamp imprints should be placed preferably on the extreme left of the front side of the prescription form. Many doctors as well as dentists use prescription forms which provide space suitable for this purpose, but when there is insufficient area on the front of the form the stamp should be placed on the left hand side on the back. It should be noted that coding stamps must be placed either all on the front or all on the back of an individual form. In no circumstances should the stamp imprint appear on both the back and front. Chemists are asked to avoid stamping or writing over the unique identifying number pre-printed above the letters 'N.H.S.' on the N.H.S. prescription forms supplied to medical practitioners or over the 'D.P. No.' box on N.H.S. dental prescription forms supplied to dental practitioners by the Commonwealth.

111. Where there is insufficient space either on the front or the back of the form for the coding stamp, the coding should be on a slip of paper firmly attached to the form.

112. This stamp will be used for all pharmaceutical benefits—

Coding of Ready Prepared Benefits

113.—

'S'—Serial Number (see paragraph 97).

'C'—Is the appropriate code. All codes are shown in the Schedule of Benefits for Approved Chemists beside the benefits to which they refer. These numbers range from 1001Q to 3395Q.

'Q'—Quantity. The number of units dispensed, e.g., capsules, tablets, tins, vials, tubes, etc., is to be entered in the stamp imprint. Only the appropriate number should be shown. The type of dispensing unit should not be specified.

For regulation 24 prescriptions, the quantity actually supplied should be entered; that is the total of the original quantity plus the quantities ordered as repeats. (Note next paragraph.)

The dispensed quantity of PACKS NOT TO BE BROKEN should never be expressed as a volume or weight but always in those terms in which the maximum quantity is expressed in column 3 of section 2 or section 3 of the Schedule; e.g., a prescription ordering 200 ml of a pack not to be broken should be coded with a quantity of '1' and not '200'.

For all Regulation 24 prescriptions, the letter 'X' should be entered on the stamp imprint immediately after the quantity.

'B'—Brand Ordered. Where a doctor or dentist orders a particular brand either by proprietary name or brand, the code letters of the manufacturer whose brand is ordered should be entered beside the letter 'B'. Where a particular brand is not ordered THIS SPACE MUST BE LEFT BLANK.

'R'—Repeats. Where repeats (up to the allowable maximum) are ordered on an original prescription, the number so ordered should be entered in this space, including those cases where supply has been made under Regulation 24.

'No.'—Prescription identification number (see paragraph 94).

Coding of Extemporaneously Dispensed Benefits included in the Standard Formulae List

114.—

'S'—Serial Number (see paragraph 97).

'C'—Code obtained from the Standard Formulae List where one is shown. These codes range from 7300F to 9987P.

'Q'—Quantity. The number of millilitres or grammes should be entered.

Where the supply of a standard preparation is made under Regulation 24, the quantity actually supplied followed by the letter 'X' should be entered.

'B'—This space must be left blank when coding extemporaneously dispensed prescriptions (except for provision made in paragraph 115).

'R'—Repeats. Where repeats (up to the allowable maximum) are ordered on an original prescription, the number so ordered should be entered in this space, including those cases where supply has been made under Regulation 24.

'No.'—Prescription Identification Number (see paragraph 94).

Dropper Containers

115. Dispensed prices for extemporaneously prepared eye drops, ear drops and nasal instillations include the cost of a polythene dropper container. Where a glass dropper container is specified by the prescriber or considered necessary by the approved chemist, the prescription should be endorsed accordingly and payment for same should be claimed by placing the letter 'g' in the brand space of the coding stamp.

Coding of Extemporaneously Dispensed Benefits which are not listed in the Standard Formulae List

116. In the case of formulae for which a code is not shown claimants will receive an average 10 g/ml rate for the type of preparation with provision to price exceptional prescriptions (see paragraph 105) or the claimants may elect to calculate the cost of ingredients, containers and professional fee manually (see paragraphs 99-104). These arrangements have been agreed between the Department and the Pharmacy Guild of Australia.

Action to be taken where an Approved Chemist is to be paid on an Average Price Basis

117.—

(a) Coding of prescriptions to be reimbursed on an average price basis.

(i) Enter the serial number, number of repeats ordered (up to the allowable maximum), if any, and the prescription identifying number in the appropriate places on the stamp imprint.

(ii) Enter the three-character code for the type of preparation in the code space (see the Table of Codes, section 4 [Green Pages] for these codes).

(iii) Enter the number of millilitres or grammes.

(iv) Where a supply is made under the provisions of Regulation 24, the letter 'X' should be entered after the quantity.

NOTE:—The space following the letter 'B' should be left blank (except for provision made in paragraph 115).

(b) Coding of Exceptional Prescriptions as defined in paragraph 105.

(i) Enter the serial number, number of repeats ordered (up to the allowable maximum), if any, and the prescription identifying number in the appropriate places in the stamp imprint.

(ii) Enter the three-character code for the type of preparation preceded by the letter 'V' (indicating that this prescription is priced) in the code spaces. (See the Table of Codes, section 4 [Green Pages] for these codes.)

- (iii) Enter the calculated price in the quantity space.
- (iv) Where the supply is made under the provisions of Regulation 24 the letter 'X' should be entered after the price.

NOTE:—The space following the letter 'B' should be left blank (except for provision made in paragraph 115).

Action to be taken when an Approved Chemist elects to price non-pre-priced Extemporaneous Preparations

118. When the approved chemist has advised the Department of his election to price out these prescriptions he should price all prescriptions in this category in accordance with the pricing principles set out in 'Provisions governing Payments to Approved Chemists for N.H.S. dispensing' (pages 15-17 and—

- (i) enter the serial number, number of repeats ordered (up to the allowable maximum), if any, and the prescription identifying number in the appropriate sections of the stamp imprint;
- (ii) enter only the letter 'V' in the code space. This indicates that the prescription has been priced out;
- (iii) enter the price he has calculated in the quantity space;
- (iv) where a supply is made under the provisions of Regulation 24, the letter 'X' should be entered after the price.

NOTE:—No details of type or quantity of preparation are to be shown in the code stamp.

Coding of Repeat Authorisation Forms

119. The approved chemist originating a repeat will enter on the form the information set out in paragraph 50 together with the code, quantity and where applicable the brand of the benefit ordered.

Coding of Repeat Authorisation Forms Used for Deferred Supply

120. An approved chemist who has supplied a benefit on the presentation of a repeat authorisation form which has been prepared for deferred supply should code the form in the same manner as a normal repeat authorisation except that the serial number allotted by the approved chemist in respect of a benefit supplied as a general benefit is to be preceded by the letter 'D' and the letters 'DP' in the case of a pensioner benefit.

Action by Approved Chemist Dispensing a Repeat Authorisation

121. It is the responsibility of the chemist dispensing a repeat supply to ensure the details of the coding on the repeat authorisation form are correct. It should be noted that:

- (a) The serial number allotted by the approved chemist to the repeat supplied as a \$2.75 general prescription is entered beside the letter 'R' in the box at the top of the form. Serial numbers issued in respect of

repeats supplied for which an Authority to Prescribe is required must be prefixed with the letter 'A' in the case of general benefits, and the letters 'AP' in the case of pensioner benefits.

- (b) The new identifying number of the Repeat Authorisation is to be entered in the space marked 'No.' in the Coding Stamp Box on the front of the form. (See paragraph 95.)
- (c) When the approved chemist issuing the authorisation has entered a code number (for the type of preparation) and quantity in the stamp and the dispensing approved chemist has elected to price such prescriptions instead of accepting the average price, the dispensing approved chemist should strike out the entries and replace them with 'V' and the claimed price or vice versa.

Coding of Emergency Drug (Doctor's Bag) Order Forms

122. For each item ordered, enter the serial number, code of the benefit, quantity supplied and the brand ordered, if any.

D. STATEMENT OF ACCOUNT

123. A Statement of Account will be forwarded in respect of each claim passed for payment. This gives, in addition to the details of payment, the price paid for each benefit or the reason for non-payment. Prescriptions are identified on the Statement of Account by the serial numbers allotted by the claimant and the Item Code. In the case of non-pre-priced extemporaneously prepared benefits the letter 'V' or the three-character code for the type of preparation replaces the item codes according to whether the prescriptions have been paid on the average price or calculated price basis. Serial Numbers of Emergency Drug (Doctor's Bag) items will be prefixed by the letter 'D' and the pensioner prescriptions by the letter 'P'.

124. The reason for non-payment of any item will be indicated by a Code letter. An explanation of the Code employed appears on the reverse side of the Statement of Account.

125. Prescriptions and repeat authorisations which are not acceptable for payment will be returned with the Statement of Account. Other prescriptions appearing on such forms will have been paid and appropriately cancelled before being returned to the approved chemist. Where prescriptions are resubmitted they must be allotted an entirely new serial number and included as a normal part of the next claim.

126. If prescriptions from previous claims are the subject of adjustment to current claims, full details will be shown on the Statement of Account.

127. Where a correctly coded prescription has not been given a serial number by the claimant, the serial number given to the preceding prescription will be used also as a means of reference to the second pre-

scription, i.e., the serial number will appear twice on the Statement of Account with the appropriate prices or rejection codes relating to both prescriptions.

128. Should serial numbers be duplicated they will be shown on the Statement of Account as numbered by the claimant.

129. In the case of a serial number which has not been used or the relevant document not submitted the number will be printed on the Statement of Account together with a code signifying that the document has not been received.

130. The Statement of Account will include a statement reconciling the number of prescriptions claimed for by the approved chemist with the number of prescriptions for which payment has been made.

PROVISIONS GOVERNING PAYMENTS TO APPROVED CHEMISTS FOR N.H.S. DISPENSING

A. READY PREPARED ITEMS

Price where Maximum Quantity Prescribed (Ready Prepared Items)

131. The price payable for a benefit is the amount shown in column 5 of the Schedule against the benefit subject to the following provision—

Injectors with required solvent—Where the words 'solvent required' are included after the form of the benefit, the price payable is the sum of the listed prices for the item and the solvent less a professional fee (i.e., only one professional fee is payable). Prescribers must indicate volume and number of ampoules of solvent to be supplied.

Price where Broken Quantity Prescribed (R.P. Items)

132.—

(a) Packs not to be broken—Where items packed by the manufacturer under special conditions or for which the maximum quantity has been determined as a single pack are prescribed (see paragraph 134), maximum quantity should be supplied and the price payable is that for the maximum quantity.

(b) Ready Prepared Items where Standard Pack coincides with Maximum Quantity—Where the standard pack coincides with the maximum quantity, the price payable for a broken quantity is ascertained as follows—

(i) an amount equivalent to the professional fee and where applicable the dangerous drug fee is deducted from the price shown in column 5 of the Schedule in relation to the benefit.

(ii) To the resultant amount is applied the appropriate wastage percentage ascertained from the Wastage Factor Table shown in paragraph 136.

(iii) The amount ascertained under (ii) is added to an amount equivalent to the professional fee, the dangerous drug fee, where applicable, and the appropriate container fee.

In no case shall the price payable for a broken quantity exceed the dispensed price shown in column 5 of the Schedule in relation to the maximum quantity of the benefit.

(c) Ready Prepared Items where Standard Pack does not coincide with Maximum Quantity (i.e. where an asterisk is shown against the price)—In cases where the standard pack does not coincide with the maximum quantity an asterisk has been placed in column 5 of the Schedule beside the price shown for the benefit concerned. In such cases the standard pack rate is set out in the Table shown in section 6 (Blue pages) of the Schedule. The price payable for the quantity supplied is ascertained as follows:—

(i) To the standard rate is applied the appropriate wastage table percentage ascertained from the Wastage Factor Table shown in paragraph 136.

(ii) The amount so ascertained is added to an amount equivalent to the professional fee, the dangerous drug fee, where applicable, and the appropriate container fee.

In no case shall the price payable for a broken quantity which is less than the maximum quantity of the item exceed the dispensed price for the maximum quantity of that item.

(d) No container fee is payable where the quantity of benefit ordered and supplied is more than the quantity contained in the standard or non-standard packs.

Price for Unbranded Prescriptions

133. Where a standard pack price applies, the lowest price for the relevant State shown in column 5 of the Schedule in relation to that item is payable.

Unbroken Packs to be Supplied (‡)

134. The maximum quantity of certain forms of benefits such as eye drops and oral suspensions has been determined as a single pack corresponding to the manufacturer's pack. Where a prescription calls for a quantity less than the manufacturer's pack, the maximum quantity should be dispensed and claimed from the Department. These items are indicated by a double dagger (‡) in the Schedule.

Wastage Table Percentage for Ready Prepared Preparations

135. The wastage table shown below is used in ascertaining the price payable for quantities dispensed from the Standard Pack. (Refer paragraph 132 (b) and (c) above.)

136. The appropriate wastage table percentage is ascertained as follows:—

- (a) The percentage that the quantity supplied bears to the number contained in the standard pack is determined.
- (b) Where the percentage determined in subparagraph (a) coincides with a percentage listed in Column A of the Wastage Factor Table, the percentage used is the relative figure shown in Column B;
- (c) Where the percentage determined in subparagraph (a) does not coincide with a percentage in Column A, then the nearest upward percentage in Column A applies, and the percentage used is the relative figure shown in Column B.

For example, suppose that 24 tablets are supplied and that the number in the Standard Pack is 100. Thus 24% of the number contained in the Standard Pack is supplied. As this percentage does not appear in Column A the next higher (i.e. 25%) is used. Reading down from 25% to Column B, the wastage table percentage is found to be 38%.

WASTAGE FACTOR TABLE

Column A	5	10	15	20	25	30	35	40	45	50
Column B	10	18	26	32	38	44	50	54	58	62
Column A	55	60	65	70	75	80	85	90	95	100
Column B	66	70	74	78	82	86	90	94	98	100

Prescribers' List Items

137. The price payable for the supply of the maximum quantity of extemporaneous preparations included in the Prescribers' List is shown in the Standard Formulae List.

B. EXTEMPOREANEOUSLY PREPARED PRESCRIPTIONS

Pricing Prescriptions Not Pre-Priced

138. The following are the principles applied in determining the prices of all pre-priced extemporaneous formulae shown in the booklet—'Extemporaneously Prepared Benefits'. They also apply where a chemist elects to price out extemporaneous prescriptions outside the Standard Formulae List.

139. The amount payable is ascertained as the sum of—

- (a) the recovery price of each ingredient as shown in the booklet—'Extemporaneously Prepared Benefits';

- (b) the price of the appropriate container as shown in the booklet—'Extemporaneously Prepared Benefits';
- (c) a professional fee as shown on page 18 of the booklet—'Extemporaneously Prepared Benefits'.

Pricing of Ingredients

140. Where the quantity is not specified in the Drug Tariff, the recovery price may be ascertained as follows—

- (a) determine the basic pricing unit relative to the quantity by reference to the following table:—

Quantity	Basic Pricing Unit
Up to 50 mg (minimum price)	100 mg price multiplied by 0.5
Over 50 mg and up to and including 700 mg	100 mg price
Over 700 mg and up to and including 1 g	price as 1 g
Over 1 g and up to and including 7 g	1 g price
Over 7 g and up to and including 10 g ..	price as 10 g
Over 10 g and up to and including 80 g ..	10 g price
Over 80 g and up to and including 90 g ..	price as 80 g
Over 90 g	100 g price

- (b) ascertain the recovery price of the basic pricing unit by the application of the following quantity divisors to the recovery price shown for the ingredient in the Drug Tariff—

100 g price is 500 g price divided by 5 or 1 kg price divided by 10.

10 g price is 100 g price plus 12½% divided by 10.

1 g price is 10 g price plus 25% divided by 10.

100 mg price is 1 g price plus 25% divided by 10.

- (c) ascertain the recovery price by multiplying the price of the basic pricing unit, as ascertained in (b), by the fraction that the quantity bears to the basic pricing unit.

- (d) for pricing purposes the quantity is to be taken to the next 50 milligrams or 0.05 millilitres.

Miscellaneous Pricing Rules

141.—

- (a) The minimum recovery price for any ingredient is one cent.
- (b) Where a fraction of a cent occurs in a price that price is to be taken to the nearest cent, a half cent being taken up to the next cent.

- (c) The amount payable for a quantity of an ingredient or preparation shall not exceed the amount which would be payable for a greater amount of that ingredient or preparation.

Pricing Prescriptions where Additional Ingredients have been added to a Specified Formula

142. The amount payable for a prescription which comprises a vehicle which is specified under a particular name, and an additional specified ingredient or ingredients shall be calculated in accordance with paragraphs 143 to 146.

143. Where the vehicle is a single liquid ingredient and one or more solid ingredients are added, displacement of the vehicle by solids shall be disregarded and the amount payable shall be calculated in accordance with paragraph 140.

144. Where the vehicle is a single liquid ingredient and one or more liquids are added, the amount payable for the ingredients shall be the sum of:—

- (a) the recovery price of the added ingredients, calculated in accordance with paragraph 140; and
- (b) the recovery price of the quantity of the vehicle calculated in accordance with paragraph 140.

145. Where the vehicle is compounded from two or more ingredients and one or more solid ingredients are added, displacement of the vehicle by the solids shall be disregarded and the amount payable for the ingredients shall be the sum of:—

- (a) the recovery price of the added ingredients, calculated in accordance with paragraph 140; and
- (b) the recovery price of each ingredient of the vehicle calculated in accordance with paragraph 140.

146. Where the vehicle is compounded from two or more ingredients and one or more liquid ingredients are added, the amount payable for the ingredients shall be the sum of:—

- (a) the recovery price of the added ingredients, calculated in accordance with paragraph 140; and
- (b) the recovery price of the quantity of vehicle, this amount being the sum of the recovery prices for each ingredient of the vehicle in such quantity as calculated in accordance with paragraph 140.

C. GENERAL

Pricing Principles

147. The pricing principles are identical for prescriptions written for the general public and pensioners.

Fees and Containers

148. The amounts payable by way of professional fee, dangerous drug fee and container charges for ready prepared preparations are set out in section 6 of the Schedule. The professional fee and container charges for extemporaneously prepared preparations are set out in the booklet—'Extemporaneously Prepared Benefits'.

Pricing Dates

149. For pricing purposes the operative dates are—

- (a) for extemporaneously prepared benefits—the first day of every second month commencing February each year for benefits supplied as from the first day of the fourth succeeding month.
- (b) for ready prepared benefits—the first day of the month preceding the month during which the benefits are dispensed.
- (c) for containers—
 - (i) for extemporaneously prepared benefits—the first day of April, August and December each year for benefits supplied as from the first day of the fourth succeeding month.
 - (ii) for ready prepared benefits—the first day of January each year for benefits supplied as from the first day of April in that year.

Isolated Pharmacy Allowance (IPA)

150. Approved chemists providing a pharmaceutical service in isolated areas may apply for IPA on the basis of economic need. Application forms may be obtained from the Assistant Director-General, Pharmaceutical Benefits Branch, Department of Health, P.O. Box 100, Woden, A.C.T., 2606.

151. Approved chemists eligible to receive IPA will be—

- (i) those where the pharmacy is more than 25 kilometres from the nearest pharmacy and who are able to demonstrate the need for such allowance on the basis of economic need;
- (ii) those where the pharmacy can be demonstrated to be 'isolated' on a basis other than distance (e.g. on an island, intervening mountain range, no roads) and where economic need can be demonstrated.

NOTE: Only those brands of benefits listed in section 2 (White Pages) may be ordered on a Doctor's Bag Order Form.

SCHEDULE OF BENEFITS

Operative as from 1 December 1979

SECTION 2

RESTRICTED BENEFITS

All restricted items are printed in red.

A straight line is drawn between entries for different forms and strengths of an item to clearly indicate the different restrictions which apply to these various forms and strengths.

The maximum quantity and/or number of repeats in respect of an item shown in the Schedule may be varied by the Director of Health when issuing an authority prescription (Form PB86) or an authority to prescribe (Form PB15). The quantity and number of repeats shown on the authority shall be supplied. Payment will be made on the basis of the price shown for that item in the Schedule. (See paragraphs 26,27 and 64 of Section 1 - Explanatory Notes (16th pages)).

SYMBOLS USED IN THE SCHEDULE

An asterisk (*) against the price of a benefit indicates that the manufacturer's pack does not coincide with the maximum quantity.

A double dagger (‡) in the maximum quantity column indicates an item for which the maximum quantity has been specially determined to correspond to the manufacturer's pack and the manufacturer's standard pack should be supplied.

A gauge sign (#) against the price of an item indicates that the product is not preconstituted and that a special professional fee of \$1.95 is included in the dispensed price.

Where a STATE is indicated after a manufacturer's code, that brand may be available only in the State indicated.

N.S.W. - (N); Vic. - (V); Qld. - (Q); S.A. - (S); W.A. - (W); Tas. - (T).

Cetomacrogol Emulsifying Wax ..	15	g
Liquid Paraffin ..	10	g
White Soft Paraffin ..	10	g
Chlorocresol ..	100	mg
Propylene Glycol ..	5	ml
Purified Water, freshly boiled and cooled to ..	100	g

7661F CETRIMIDE AQUEOUS (APF)

Cetrimide ..	500	mg
Chlorocresol ..	100	mg
Cetostearyl Alcohol ..	5	g
Liquid Paraffin ..	50	g
Purified Water, freshly boiled and cooled to ..	100	g

PRESCRIPTION

7490F CHLORHEXIDINE, AQUEOUS (APF) (Chlorhexidine BP, BPC)

Chlorhexidine Gluconate Solution ..	5	ml
Cetomacrogol Emulsifying Wax ..	25	g
Liquid Paraffin ..	10	g
Purified Water, freshly boiled and cooled to ..	100	g

7318E COAL TAR and ZINC, OILY (APF)

Coal Tar, BPC ..	1	g
Castor Oil ..	1	g
Zinc Cream Oily APF ..	98	g

7499Q COLD (APF)

White Beeswax ..	17	g
Liquid Paraffin ..	45	g
Borax ..	1	g
Purified Water, freshly boiled and cooled to ..	37	g

7664J GLYCEROL, OILY (APF)

Glycerol ..	20	g
Calcium Hydroxide Solution ..	32	ml
Arachis Oil ..	22	g
Wool Fat ..	26	g

7666L ICHTHAMMOL and ZINC, OILY (APF)

Ichthammol ..	5	g
Wool Fat ..	15	g
Zinc Cream Oily APF ..	80	g

9556Y OILY (APF)

Wool Alcohols Ointment, APF ..	50	g
Purified Water, freshly boiled and cooled to ..	50	ml

7892J SALICYLIC ACID and RESORCINOL, AQUEOUS (APF)

Salicylic Acid ..	2	g
Resorcinol ..	2	g
Aqueous Cream, APF to ..	100	g

7893K SALICYLIC ACID and SULPHUR, AQUEOUS (APF)

Salicylic Acid ..	2	g
Precipitated Sulphur ..	2	g
Spike Lavender Oil ..	0.5	ml
Aqueous Cream, APF to ..	100	g

7667M ZINC, OILY (APF)

Sulphurated Potash ..	10	g
Acetone ..	10	ml
Glycerol ..	10	ml
Spike Lavender Oil ..	0.4	ml
Purified Water, freshly boiled and cooled to ..	200	ml

MIXTURES

(Maximum Quantity 200 ml and 4 Repeats)

7901W ALUMINIUM HYDROXIDE and BELLADONNA (APF)

Belladonna Tincture ..	0.5	ml
Citric Acid Monohydrate ..	100	mg
Concentrated Chloroform Water ..	0.2	ml
Aluminium Hydroxide Gel to ..	10	ml

7382M AMINOPHYLLINE COMPOUND (PL)

Phenobarbitone Sodium ..	20	mg
Ephedrine Hydrochloride ..	15	mg
Potassium Iodide ..	500	mg
Aminophylline ..	100	mg
Liquorice Liquid Extract ..	0.5	ml
Concentrated Chloroform Water ..	0.25	ml
Purified Water to ..	10	ml

7905C ASPIRIN (APF)

Aspirin ..	500	mg
Compound Tragacanth Powder ..	250	mg
Orange Syrup, APF ..	1	ml
Concentrated Chloroform Water ..	0.25	ml
Purified Water to ..	10	ml

7384P CAFFEINE, IODIDE and EPHEDRINE (PL)

Synonym: C.I.E. Mixture

Caffeine ..	150	mg
Sodium Iodide ..	500	mg
Ephedrine Hydrochloride ..	20	mg
Tolu Syrup ..	4	ml
Spirit of Aniseed ..	0.06	ml
Purified Water to ..	10	ml

PRESCRIPTION

MIXTURES—continued

Vioform	CB	Clioquinol
Viokase	RS	Pancreatin Enzyme
Visken	SZ	Pindolol
Winsprin	WL	Aspirin
Xylocard 100	AP	Lignocaine
Xylocard 300 I.M.	AP	Lignocaine
Xylocard 500	AP	Lignocaine
Yomesan	BN	Niclosamide
Zadine	SH	Azatadine Maleate
Zarontin	PD	Ethosuximide
Zephiran Concentrated	WL	Benzalkonium Chloride
Zerodor	ZR	Deodorant Concentrate (C & I)
Zinamide	MK	Pyrazinamide
Zincfrin	AQ	Zinc Sulphate with Phenylephrine
Zoff	SN	Surgical Cement
Zyloprim	BW	Allopurinol

TRADE NAMES INDEX

The following words, in association with a chemical name or generic name or approved name indicate the product of the manufacturer shown.

Abboject	Abbott A'asia - Injections
Chewies	Dista - Chewable tablets
Cota-Tabs	Faulding - Coated tablets
Dropster	Knoll Laboratories - Eye and ear drops
Dulcets	Abbott A'asia - Chewable tablets
Durules	Astra Chemicals - Sustained release tablets
Emplets	Parke, Davis - Tablet preparations
Ensa	Reckitts - Tablet preparations
Enseals	Lilly - Enteric coated tablets
Evanules	Allen & Hanburys - Injections
Filmtabs	Abbott A'asia - Coated tablets
Flex Flac	Vifor - Intravenous fluids
Gradumets	Abbott A'asia - Sustained release tablets
Hamiltabs	Hamilton Laboratories - Tablet preparations
Hermette	Bull Laboratories - Injections
Hyperduric	Glaxo - Injections
Isoject	Pfizer Pty Ltd - Injections
Isopto	Alcon Laboratories - Eye drops
Kapseals	Parke, Davis - Capsules
Linguets	Ciba Pharmaceuticals - Sublingual tablets
Novo	Novo Laboratories - Preparations
Orgaject	Organon - Injections
Pedipac	Lilly - Sachets
Prestab	Ethnor - Tablet preparations
Pulvules	Lilly - Capsules
Rox	Rocke Tompsitt - Preparations
Siguent	Sigma - Ointment preparations
Spansules	Smith, Kline & French - Delayed release capsules
Sterivial	Parke, Davis - Injections
Sterop	Ethnor - Eye drops
Sustets	Lederle - Sustained release capsules
Tabloid	Burroughs Wellcome - Tablet preparations
Tastitabs	Pfizer Pty Ltd - Chewable tablets
Tri-Test	Aust. Pharm. Industries - Preparations
Venosol	Abbott A'asia - Intravenous fluids
Viaflex	Travenol Laboratories - Intravenous fluids
Viules	Boots - Injections
Wellcome	Burroughs Wellcome - Preparations

CODE INDEX

The information contained in this section is intended to facilitate the identification of a pharmaceutical benefit item from any given five-character or three-character code.

PHARMACEUTICAL BENEFITS

Explanatory Circular regarding the December 1979 edition of the Schedule of Benefits for Medical Practitioners.

The reprint of the schedule will take effect on 1 December 1979 and all previous editions of the schedule are cancelled.

Your attention is drawn to the following: —

A list of items for which an authority to prescribe may be granted to provide up to six months' therapy is published on page 24 of the explanatory notes, section 1 (lemon pages). Paragraph 31 of the notes also refers.

Mineral Mixture Powder 250g (*Aminogran M. M.*) previously listed under AMINO ACID FORMULA without PHENYLALANINE is now listed separately under MINERAL MIXTURE, 250g powder (*Aminogran M. M.*).

The Pensioner Health Benefits Card is being revised. A facsimile of the 1980 Card is published on page 23.

SPIRONOLACTONE

Following recent changes to the restrictions on the availability of spironolactone as a pharmaceutical benefit there have been a number of queries regarding alternative drugs available as benefits for use as potassium-sparing diuretics.

In reviewing spironolactone, the Pharmaceutical Benefits Advisory Committee commissioned a number of independent evaluations of the published literature on spironolactone, amiloride and triamterene by recognised experts in this field of medicine. It was agreed that amiloride and triamterene were satisfactory alternatives and exhibited a lower level of adverse effects.

SECTION 1—EXPLANATORY NOTES

PRESCRIBING OF BENEFITS—PROCEDURE BY DOCTORS

1. Pharmaceutical benefits which may be prescribed by doctors are listed in this book.

2. Ready prepared items are listed in Sections 2 and 3 of the Schedule of Benefits. Restrictions apply to the prescribing of some items in Section 2 and all the items in Section 3. Further details may be found in these notes—paragraphs 22-23.

3. The Schedule of ready prepared items includes the form, manner of administration and brand of these items which may be prescribed. Where the words 'solvent required' are included after the form, the item and a solvent may be prescribed as one benefit. In such cases, any listed brand of solvent may be ordered with the item. For clarity, such benefits should be written as one prescription, e.g. 'Benzylpenicillin, Injection 300 mg amp with 2 ml water for injections'.

4. The Schedule also shows the maximum quantity and the number of repeats allowable for each item. Further details may be found in these notes—paragraphs 24-33.

5. The drugs which may be used in extemporaneous preparations are listed in Section 4 (Green Pages). Where a restriction applies to the use of a drug listed in this Section it is indicated against the item.

6. The following admixtures are not pharmaceutical benefits:—

- (a) the admixture of two or more ready prepared items listed in the Schedule of Benefits; or
- (b) the admixture of a ready prepared item and a drug or drugs listed in Section 4 of the Schedule of Benefits.

7. Formulae in common use are listed in Section 5—Prescribers' List (Green Pages).

8. A proprietary name index of ready prepared items is included after Section 5.

9. Symbols used in the Schedule of Benefits are explained on page 1, Section 2 (White Pages).

Explanatory and Warning Statements

10. The use of 'Note' in Section 2 (White Pages) of the Schedule is reserved for explanatory purposes in relation to the prescribing of some drugs as pharmaceutical benefits.

11. The use of 'Caution' in Section 2 (White Pages) of the Schedule is reserved for the purpose of warning of adverse reactions or precautions associated with the use of a drug. The absence of a cautionary note does not necessarily imply that significant adverse reactions may not be encountered.

Prescriptions

12. A prescription ordering a pharmaceutical benefit may be written only for the medical treatment of the person named on the prescription and requiring treatment with that pharmaceutical benefit and must not be written for any other purpose. The prescription is valid only when it is written by a registered medical practitioner.

13. CARE MUST BE TAKEN TO COMPLY WITH THE PROVISIONS OF STATE LAW, PARTICULARLY IN REGARD TO THE PRESCRIBING OF DRUGS LISTED AS NARCOTIC, SPECIFIED OR RESTRICTED UNDER STATE LEGISLATION.

14. With regard to DRUGS OF ADDICTION, notification or approval of the appropriate State Health Authority or officer is required in all States for therapeutic use for a period exceeding two months (eight weeks in Victoria). Prior approval of the appropriate State Health Authority or officer is required in all States for the treatment of DRUG DEPENDENT PERSONS with ANY DRUG OF ADDICTION.

15. Medical practitioners are required by legislation under the National Health Act to observe the following rules when writing prescriptions for pharmaceutical benefits:—

- (a) Write the prescription in indelible form, i.e., ink or ball point pen in own handwriting (or with the approval of the Director-General otherwise record the prescription) either on the standard prescription form supplied by the Department or on paper as near as convenient to 18 cm x 12 cm. The name and address of the medical practitioner must be shown and 'N.H.S.' endorsed at the top.
- (b) Write the prescription in duplicate marking the duplicate copy with the word 'Duplicate'. This is pre-printed on the standard prescription forms.
- (c) Set out the name and address of the patient, and where the patient is a pensioner who holds a Pensioner Health Benefits Card write the pension number. (A specimen Pensioner Health Benefits Card appears on page 23 of these notes.) EXCEPT WHERE THE PROVISIONS OF STATE LAW REGARDING NARCOTIC, SPECIFIED OR RESTRICTED DRUGS REQUIRE THE ADDRESS TO BE WRITTEN, it is not necessary to write the pensioner's address on the prescription form.
- (d) The pharmaceutical benefit must be identified in the prescription by such particulars as are necessary for the complete identification of that benefit.
- (e) In the case of pharmaceutical benefits which are restricted in use, the prescription must be endorsed in the doctor's own handwriting with the words 'Specified Purpose'. Abbreviations such as 'Spec. Purp.' or 'S.P.', will be accepted. However, where a prescription is written for a pensioner for a drug which is restricted to pensioners it is not necessary to endorse the prescription 'Specified Purpose'.

(f) If the benefit is a single drug, the manner of administration must be indicated.

(g) When directing that the maximum quantity and repeats of a pharmaceutical benefit be supplied at the one time the prescription must be endorsed in own handwriting with the words 'Regulation 24'. Further details are available in paragraphs 32, 33.

(h) Date and sign the prescription.

16. A doctor may write up to three prescriptions on a single prescription form. Each prescription must be written legibly.

17. Prescriptions for pharmaceutical benefits for more than one person must not be written on the one prescription form.

18. A prescription is not a valid pharmaceutical benefit prescription if the medical practitioner—

(a) prescribes a pharmaceutical benefit for a person in respect of whom another prescription for the same benefit has been written on the same day by the same medical practitioner;

(b) prescribes on the one form a benefit that is a drug of addiction and another benefit and directs that the supply of either benefit is to be repeated. If no repeats of either item are ordered, the prescription may be accepted;

(c) prescribes a narcotic drug for the medical practitioner writing the prescription.

19. Where a medical practitioner writes a prescription for a pharmaceutical benefit, but does not specify a particular formula or brand for the item prescribed, the chemist, when dispensing, shall give priority to either the formula, if any, for that item which is specified in the Prescribers' List (Section 5) or to one of the ready prepared brands, if any, for that item included in Section 2 or 3.

20. To avoid confusing patients and the dispensing chemist, doctors should not write prescriptions for pharmaceutical benefits and non-pharmaceutical benefits on the one form. Where the prescription is for a restricted benefit and the patient is not suffering from one of the allowable conditions the doctor should write the prescription on a private prescription form, or if he does use an N.H.S. standard prescription form, delete N.H.S. from the top of the form.

Manner of Administration

21. Where a particular manner of administration is indicated in the Schedule, the item may not be prescribed as a pharmaceutical benefit for administration in any other way, e.g., an ophthalmic preparation may not be prescribed for topical use.

Restrictions

22. Certain pharmaceutical benefits may only be prescribed for a particular class of person, for a specified purpose, disease or condition, or with the written authority of the Commonwealth Director of Health in the State concerned. Full particulars of these items and their restrictions are printed in red in Sections 2 and 3 (White Pages) of the Schedule. It is not necessary for the particular restriction to be identified on the prescription.

23. Pharmaceutical benefits which are available for use for colostomy and ileostomy conditions as well as pharmaceutical benefits which are available for use by paraplegic and quadriplegic patients are listed in Section 3 of the Schedule.

Maximum Quantities and Repeats

24. For ready prepared preparations, the allowable maximum quantity and number of repeats are shown in the second and third columns of Sections 2 and 3. For other preparations, details are set out in the Table of Maximum Quantities and Repeats (Green Pages).

25. Where the maximum quantity of an item is marked with a double dagger (‡), the maximum quantity has been determined as a single pack. In such instances, chemists are required to supply unbroken packs (see page 1, Section 2 White Pages). These items should be prescribed in the standard pack sizes.

26. For other items it is not necessary to prescribe the maximum quantity either for the original or for a repeat supply, if the medical practitioner considers a lesser quantity is sufficient for the patient's needs.

27. If a medical practitioner requires a prescription to be repeated, he must show the quantity to be supplied and the number of repeats. It is not necessary for the maximum quantity to be ordered before the supply can be repeated. Repeats may be for any quantity up to the maximum, irrespective of whether the original supply is for an equal, greater or lesser quantity.

28. The relevant maximum quantity and number of repeats are not to be exceeded, unless the prescription is accompanied by a written authority from the Commonwealth Director of Health (see paragraphs 30, 31).

29. The normal maximum quantity and number of repeats for pharmaceutical benefit items are recommended by the Pharmaceutical Benefits Advisory Committee (PBAC). For the treatment of an acute condition the PBAC recommends a maximum quantity which will provide sufficient medication for the treatment of the condition; for the treatment of chronic conditions the PBAC recommends sufficient, at normal dosage levels, for one month's treatment and two repeats.

30. However, special provisions exist to assist chronically ill patients who require larger quantities of drugs and/or continuous treatment. In most cases under these provisions a doctor may, if he considers it to be in his patient's interest, apply to the Commonwealth Director of Health in his State for authority to prescribe a quantity in excess of the listed maximum quantity and/or number of repeats.

31. Normally a quantity sufficient for approximately three months' treatment at the higher dosage levels, i.e. one month's treatment with two repeats, may be authorised by the Director. For certain items the Pharmaceutical Benefits Advisory Committee has recommended that authorities may be granted to provide for up to six months' treatment i.e. one month's treatment with five repeats. A list of these items appears on page 24. One patient contribution fee is payable for each supply of the benefit so authorised. For restricted drugs, where the written authority of the Commonwealth Director of Health is required to prescribe the provisions of this paragraph will apply except where otherwise indicated in the individual entry in Section 2 of the Schedule.

Regulation 24

32. Generally, a pharmaceutical benefit may not be supplied to the same person more than once on any one day. However, a doctor may direct that the original supply and the repeat supplies of a benefit ordered in a prescription be supplied at the one time, provided he is satisfied that—

- (a) the maximum quantity specified for the benefit is insufficient for the medical treatment of the person for whom it is prescribed;
- (b) that person is suffering from a chronic illness or is resident in a place remote from the nearest approved pharmaceutical chemist; and
- (c) that person, without great hardship, could not obtain the pharmaceutical benefit on separate occasions.

The doctor must endorse the prescription 'Regulation 24' as certification that the above conditions have been satisfied.

33. Where a prescription is endorsed 'Regulation 24' the dispensing chemist should make the relevant prescribed charge for the original and the same charge for each repeat that would normally be needed to make up the total supplies, for example, if the prescription orders two repeats, three patient contributions would be charged to a patient other than an eligible pensioner.

Patient Contribution

34. The dispensing chemist may in respect of each supply by him whether on a prescription or repeat authorisation, charge the person to whom the pharmaceutical benefit is supplied an amount not exceeding \$2.75 in respect of general patients. A charge is not to be made for the supply of a pharmaceutical benefit on a prescription on which the prescribing medical practitioner has written the pension number.

35. A prescription, other than a prescription for a pensioner, written for a benefit for which the dispensed price at the date of supply is equal to or less than \$2.75 is not a prescription for a pharmaceutical benefit. This also applies to prescriptions endorsed 'Regulation 24' (see paragraphs 32, 33), for which the price of the total quantity of the benefit supplied is less than the authorised charge specified in paragraph 33.

Authority to Prescribe

36. Where the written authority of the Commonwealth Director of Health is required to prescribe:

- (i) restricted drugs (paragraphs 22, 23); or
- (ii) increased maximum quantities (paragraphs 30, 31); and/or
- (iii) increased number of repeats (paragraphs 30, 31).

application should be made on the combined application/authority prescription form (Form PB86). The 'office copy' together with the completed original and duplicate of the authority prescription are to be forwarded to the Director. The doctor's copy should be retained.

37. The original and duplicate authority prescription, when authorised, can be returned to the doctor or sent direct to the patient. If the application can be approved after some amendment, an Authority to Prescribe (Form PB15) will be forwarded to the doctor, specifying what has been approved. A new prescription should then be written on the form PB15, the original and duplicate sent to the patient, and the triplicate (green copy) retained by the doctor.

Urgent Cases

38. In urgent cases, a chemist may supply a benefit before the prescription is surrendered to him, if the doctor communicates the prescription to the chemist by telephone or other means. *In such cases the doctor must write out the prescription and forward it to the approved chemist who made the supply within 24 hours of such communication.* This provision does not apply to prescriptions for supply by chemists where the law of the State in which the chemist's premises are situated requires the prescription to be in writing.

39. The provision for communication of prescriptions in urgent cases applies also to those drugs for which the written authority of the Director of Health is necessary for supply as a pharmaceutical benefit (see paragraph 22). In such cases the doctor must first obtain advice from the Commonwealth Director of Health in the particular State, by telephone or other means, that the authority will be issued, and notify the chemist accordingly when communicating the prescription. *The doctor must subsequently submit a form PB 86, obtain the written authority and forward it, within 24 hours of its receipt, to the approved chemist who supplied the benefit.*

Emergency Drug (Doctor's Bag) Supplies

40. Certain pharmaceutical benefits are provided free to doctors for emergency use. These emergency supplies are not available to ship's doctors. The patient is not required to make any payment when benefits are made available to him from these supplies.

41. Supplies of these drugs may be obtained from an approved chemist upon the production of an official Emergency Drug (Doctor's Bag) Order Form (Form PB 7) in duplicate, signed by the doctor personally. Each order form is valid during the month printed thereon and each doctor may

obtain the benefits not more often than once per month. (Doctors approved to supply pharmaceutical benefits under section 92 of the National Health Act are to use Form PB 7a which must not be presented to an approved chemist for supplies. Special instructions are issued to these doctors.)

42. The maximum quantity listed against the Emergency Drug items permitted to be obtained at the one time may be ordered provided the quantity of the item that the doctor has on hand is less than the maximum quantity.

43. A doctor may also specify on the order form any listed brand of a benefit. If this brand is not available, the doctor will be requested by the approved chemist to specify in the order another listed brand which is available, and to initial the alteration. The doctor issuing the order form must sign and date the form. A receipt for the benefits supplied on this order form must be signed by either the doctor himself or by a person authorised by him.

Enquiries

44. Any enquiries regarding the Pharmaceutical Benefits Scheme or requests for Departmental publications or stationery other than N.H.S. standard prescription pads should be made to the Commonwealth Director of Health in the capital city of your State. Orders for N.H.S. prescription pads should be forwarded to the Director-General of Health, Canberra.

SECTION 2 - SCHEDULE OF BENEFITS

Operative from 1 December 1979

SYMBOLS USED IN THE SCHEDULE

- (a) An asterisk (*) in front of a restriction indicates an additional or amended purpose in this issue.
 - (b) A double dagger (‡) in the maximum quantity column indicates an item for which the maximum quantity has been specially determined to correspond to the manufacturer's pack and the manufacturer's standard pack should be supplied.
 - (c) A gauge sign (#) against the price of an item indicates that the product is not preconstituted.
 - (d) Where a STATE is indicated after the manufacturer's code, that brand may be available only in the State indicated.
N.S.W. - (N); Vic. - (V); Qld. - (Q); S.A. - (S);
W.A. - (W); Tas. - (T).
-

A straight line is drawn between entries for different forms and strengths of an item to clearly indicate the different restrictions which apply to these various forms and strengths.

Attention is drawn to paragraph 15(e) of the explanatory notes which provides for endorsement by the prescribing doctor of prescriptions for pharmaceutical benefits with the words "specified purpose". Abbreviations such as "Spec. Purp." or "S.P." will be accepted. Where a prescription is written for a pensioner for a drug which, although restricted, is not restricted as to a disease for a pensioner, the pension number is sufficient identification and it is not necessary to endorse the prescription "specified purpose".

Except where otherwise indicated, the maximum quantity and/or number of repeats in respect of an item shown in the Schedule may be varied by the Director of Health when issuing an authority prescription (Form PB86) or an authority to prescribe (Form PB15). The quantity and number of repeats shown on the authority shall be supplied. (See paragraphs 30 and 31 of Section 1 - Explanatory Notes (Lemon pages)).

Authority required. Cows' milk allergy in children under the age of two (2) years; Cystic fibrosis (mucoviscidosis); Galactosaemia; Lactose intolerance.					
NOTE: Milk allergy means eczema, asthma or severe gastro-intestinal upset, demonstrated to be due to cows' milk by relief on withdrawal of cows' milk for one week and recurrence on subsequent feeding with cows' milk. Since cows' milk allergy and lactose intolerance are not always permanent, a further challenge with cows' milk should be made each three months. Age of patient to be shown on application for authority.					
NOTE: An authority will be limited to the maximum quantity and repeats shown in this schedule.

PRESCRIPTION

CREAMS

(Maximum Quantity 100 g and 1 Repeat)

ALUMINIUM ACETATE, OILY (APF)

Aluminium Acetate Solution	5	ml
Zinc Oxide	20	g
Wool Fat	25	g
Arachis Oil	25	ml
Purified Water, freshly boiled and cooled	27	ml

AQUEOUS (APF, BP)

Emulsifying Ointment	30	g
Chlorocresol	100	mg
Purified Water, freshly boiled and cooled to	100	g

BUFFERED, AQUEOUS (APF)

Sodium Phosphate	2.5	g
Citric Acid Monohydrate	500	mg
Chlorocresol	100	mg
Glycerol	5	ml
Emulsifying Ointment	30	g
Purified Water, freshly boiled and cooled to	100	g

CALAMINE, AQUEOUS (APF)

Calamine	4	g
Zinc Oxide	3	g
Cetomacrogol Emulsifying Wax	6	g
Arachis Oil	30	g
Purified Water, freshly boiled and cooled to	100	g

CALAMINE, OILY (APF)

Calamine	32	g
Oleic Acid	0.5	ml
Arachis Oil	21.5	ml
Wool Fat	17.5	g
Calcium Hydroxide Solution	30.5	ml

CETOMACROGOL, AQUEOUS (APF)

Cetomacrogol Emulsifying Wax	15	g
Liquid Paraffin	10	g
White Soft Paraffin	10	g
Chlorocresol	100	mg
Propylene Glycol	5	ml
Purified Water, freshly boiled and cooled to	100	g

CETRIMIDE, AQUEOUS (APF)

Oleic Acid ..	0.5	ml
Arachis Oil ..	38.5	ml
Wool Fat	25	g
Calcium Hydroxide Solution	34.5	ml

DUSTING POWDERS

(Maximum Quantity 100 g and 1 Repeat)

ZINC, STARCH and TALC (APF, BPC)

Zinc Oxide ..	25	g
Starch ..	25	g
Purified Talc, sterilised	50	g

EAR DROPS

(Maximum Quantity 15 ml and 2 Repeats)

ALUMINIUM ACETATE (APF)

Aluminium Acetate Solution	9	ml
Purified Water, freshly boiled and cooled to	15	ml

 PRESCRIPTION

EAR DROPS—continued
CHLORHEXIDINE (APF)

Chlorhexidine Acetate		7.5	mg
Purified Water, freshly boiled and cooled to		15	ml

ICHTHAMMOL (APF)

Ichthammol		10	g
Glycerol		90	g

PHENYLMERCURIC NITRATE (APF)

Phenylmercuric Nitrate		15	mg
Propylene Glycol		7.5	ml
Purified Water, freshly boiled and cooled to		15	ml

SALICYLIC ACID (APF)

Salicylic Acid		300	mg
Alcohol (90 per cent)		7.5	ml
Purified Water, freshly boiled and cooled to		15	ml

SODIUM BICARBONATE (APF, BPC)

Sodium Bicarbonate		750	mg
Glycerol		4.5	ml
Purified Water, freshly boiled and cooled to		15	ml

SPIRIT (APF)

Alcohol (90 per cent)		7.5	ml
Purified Water, freshly boiled and cooled to		15	ml

ELIXIRS

(Maximum Quantity 100 ml and 4 Repeats)

EPHEDRINE (APF)

Ephedrine Hydrochloride		20	mg
Aromatic Syrup, APF		2	ml
Concentrated Chloroform Water		0.1	ml
Purified Water to		5	ml

PHENOBARBITONE (APF)

Phenobarbitone		15	mg
Alcohol (90 per cent)		2	ml
Glycerol		1.5	ml
Aromatic Syrup, APF		1	ml
Purified Water to		5	ml
